## **People In Distress A Geographical Perspective On Psychological Wellbeing:**

*People in Distress* Sol Daiches,1981      *Mental Health and The Built Environment* David Halpern,2014-06-03 This text explores the relationship between the planned or built environment and the occurrence of mental ill health It begins by providing a broad overview of what is known about the causes of psychopathic behaviour It then goes on to discuss the issues that arise when attempting to identify the impact of the environment as a source of stress the effects that the environment can have on the quality of relationships between people and the relationship between symbolic aspects of the environment the planning process and mental health The book uses analysis and case studies drawn from the UK and US and contains example illustrations of the built environment      *Health, Disease and Society* Kelvyn Jones,Graham Moon,2022-05-24 Originally published in 1987 this textbook is a comprehensive introduction to the rapidly developing field of medical geography It illustrates the ideas methods and debates that inform contemporary approaches to the subject demonstrating the potential of a social and environmental approach to illness and health The central theme is the need to reject an exclusively biological approach to health The authors examine both the geography of health care and outline a selection of health service planning initiatives in both North America and Europe      **Current Catalog** National Library of Medicine (U.S.),1982 First multi year cumulation covers six years 1965 70      Space, Place and Mental Health Sarah Curtis,2016-04-01 There is a strong case today for a specific focus on mental public health and its relation to social and physical environments From a public health perspective we now appreciate the enormous significance of mental distress and illness as causes of disability and impairment Stress and anxiety and other mental illnesses are linked to risks in the environment This book questions how and why the social and physical environment matters for mental health and psychological wellbeing in human populations While putting forward a number of different points of view there is a particular emphasis on ideas and research from health geography which conceptualises space and place in ways that provide a distinctive focus on the interactions between people and their social and physical environment The book begins with an overview of a rich body of theory and research from sociology psychology social epidemiology social psychiatry and neuroscience considering arguments concerning mind body dualism and presenting a conceptual framework for studying how attributes of space and place are associated with human mental wellbeing It goes on to look in detail at how our mental health is associated with material or physical aspects of our environment such as natural and built landscapes with social environments involving social relationships in communities and with symbolic and imagined spaces representing the personal cultural and spiritual meanings of places These relationships are shown to be complex with potential to be beneficial or hazardous for mental health The final chapters of the book consider spaces of care and the implications of space and place for public mental health policy offering a broader view of how mental health might be improved at the population level With boxed case studies of specific research ideas and methods chapter summaries and suggestions for introductory reading this

book offers a comprehensive introduction which will be valuable for students of health geography public health sociology and anthropology of health and illness It also provides an interdisciplinary review of the literature by the author and by other writers to frame a discussion of issues that challenge more advanced researchers in these fields
