## **People Nation And State:**

**People, Nation and State** Edward Mortimer, Robert Fine, 1999-12-31 Nations in the developed world are no less immune from these complex issues whether they involve Scottish nationalism the rival national identities of Northern Ireland the uneasy integration of former GDR citizens into a united Germany the perennial problems of Afro Americans and Hispanics in the USA not to mention the myriad factors raised by the disappearance of the Soviet Union Citizenship, Belonging, and Nation-States in the Twenty-First Century Nicole Stokes-DuPass, Ramona Fruja, 2017-07-15 Citizenship Belonging and Nation States in the Twenty First Century contributes to the scholarship on citizenship and integration by examining belonging in an array of national settings and by demonstrating how nation states continue to matter in citizenship analysis Citizenship policies are positioned as state mechanisms that actively shape the integration outcomes and experiences of belonging for all who reside within the nation state This edited volume contributes an alternative to the promotion of post national models of membership and emphasizes that the most fundamental facet of citizenship a status of recognition in relationship to a nation state need not be left in the relic galleries of an allegedly outdated political past This collection offers a timely contribution both theoretical and empirical to understanding citizenship nationalism and belonging in contexts that feature not only rapid change but also levels of entrenchment in ideological and historical legacies

**The State, Non-State Organizations and Livelihood Outcomes in Sub-Saharan Africa** Roland Azibo Balgah, Emmanuel Yenshu Vubo, 2024-02-06 The discussion on the role of the state and non state actors in the improvement of livelihoods in Sub Saharan Africa SSA where economic and social development is slowest has been characterized by a disjoint between theory and empirical research This volume sets out to revisit this question by examining the place of the two types of actors in the development process and the increasing influence of public private partnerships in livelihood outcomes The book combines theoretical reflections and empirical studies on a wide variety of initiatives in several domains that seek to improve wellbeing and livelihoods with a focus on the Sub Saharan country of Cameroon The book will provide insights on an area which has been both neglected with the rise of neo liberalism and also revived by the recent introduction of the global development goals

rage over places and territories of historical linguistic and religious significance Most analyses of conflicts only consider the economic and geostrategic value of territory George W White shows that national identity is intimately bound to specific places and territories by cultural ties Nation state and territory are mutually defining and reinforcing phenomena and through careful analysis White provides a better understanding of the interactions and conflicts of the world's nation states

Kirchen in Europa haben eine spezifische Erfahrungsgeschichte mit ihrer Verhältnisbestimmung zur Nation Obwohl im Prinzip darüber einig dass der christliche Glaube in seiner Grundtendenz von einem übernationalen ja universalistischen Charakter geprägt ist wird spätestens seit dem 19. Jahrhundert immer wieder gefragt ob nicht doch Nation und nationale Identität zur Schöpfung Gottes gegenwärtig wird das in den Kirchen Europas kontrovers diskutiert eng verbunden mit Erfahrungen von Migration Nation klingt anders für protestantische Minderheitskirchen als für orthodoxe oder römisch-katholische Kirche in ehemals kommunistischen Staaten und wieder anders für deutsche Kirchen die ihre Verquickung mit dem Nationalsozialismus verarbeiten müssen Können Nationalbewusstsein und gegenwärtige Migrationserfahrungen zusammengehen Haben die Kirchen in ökumenischer Perspektive dazu etwas Spezifisches zu sagen Mit diesen Fragen beschäftigt sich dieser Tagungsband der Societas Oecumenica Mit Beiträgen von Elżbieta Adamiak Niko Huttunen Petre Maican Ivana Noble Friederike Nessel Peter Phan Hector Scerri Peter Ben Smit Andrea Strbind Ulrike Link-Wieczorek Kaholi Zhimomi Churches in Europe have specific historical experiences regarding their relationship with the nation Although in principle it is agreed that the Christian faith is in its basic tendency shaped by a supranational even universalistic character since the 19th century at the latest it has been repeatedly asked whether nation and national identity do not belong to God's creation At present this is controversially discussed in the churches of Europe closely connected with experiences of migration Can national consciousness and current migration experiences go together Do churches have anything specific to say about this in an ecumenical perspective These are the questions addressed in this conference volume of the Societas Oecumenica

*Nation-Building as Necessary Effort in Fragile States* René Grotenhuis, 2025-10-01 Policies intended to bring stability to fragile states tend to focus almost exclusively on building institutions and systems to get governance right Simply building the state is often seen as sufficient for making it stable and legitimate But policies like these René Grotenhuis shows in this book ignore the question of what makes people belong to a nation state arguing that issues of identity culture and religion are crucial to creating the sense of belonging and social

cohesion that a stable nation state requires      **Territory and Democratic Politics** Oscar Mazzoleni,2023-10-18 The book provides a comprehensive and updated introduction to concept of territory in the study of democratic politics Territory plays a rather marginal role in the traditional conceptions of democracy that in many ways still prevail today Democratic politics is often analysed from the point of view of its institutions citizens and voters while little is said about the territory through which it is expressed at most it provides a broader perimeter or context of political and institutional action The book offers instead an introductory theoretically oriented discussion of crucial issues such as the genesis of state nation the transformation of democratic citizenship the current borders policies the rising of territorial populism and the experience of 19 covid pandemic This is an open access book      From Colonization to Nation-State Riwanto Tirtosudarmo,2022-03-26 This book examines the history of the political demography of Indonesia Chronologically the book begins by introducing the colonization program as a predecessor of transmigration program after independence The transmigration program Indonesia s state policy on migration is discussed at length in the book but other migration related issues are also presented to show the complex relationship between migration and other social economic and political issues in Indonesia In the final chapter the book discusses the contemporary issues and challenges of disintegration that is facing Indonesia as a nation state The book ends with an epilog that shows Indonesia s political demography challenges in the 21st Century      **Introducing Comparative Politics** Stephen Orvis,Carol Ann Drogus,2019-12-30 Introducing Comparative Politics The Essentials is focused on core concepts and the big picture questions in comparative politics Who rules What explains political behavior Where and why Stephen Orvis and Carol Ann Drogus demonstrate the strengths and weaknesses of commonly debated theories structures and beliefs and push students to apply their understanding While detailed case studies can go in depth on specific countries and political systems this book distills its country material into the narrative increasing global awareness current event literacy and critical thinking skills Adapted from the authors Introducing Comparative Politics Fifth Edition The Essentials version offers the same framework for understanding comparative politics in a briefer format allowing you to teach the course the way you want to teach it      State / Space Neil Brenner,Bob Jessop,Martin Jones,Gordon Macleod,2008-04-15 This groundbreaking interdisciplinary volume brings together diverse analyses of state space in historical and contemporary capitalism The first volume to present an accessible yet challenging overview of the changing geographies of state power under capitalism A unique interdisciplinary collection of contributions by major theorists and analysts of state spatial restructuring in the current era Investigates some of the new political spaces that are emerging under contemporary conditions of globalization Explores state restructuring on multiple spatial scales and from a range of theoretical methodological and empirical perspectives Covers a range of topical issues in contemporary geographical political economy Contains case study material on Western Europe North America and East Asia as well as parts of Africa and South America      The American Republic O.A. **Digitising Democracy** Volker Boehme-Neßler, 2020-01-29 This book argues that in the digital era a reinvention of democracy is urgently necessary. It discusses the mounting evidence showing that digitalisation is pushing classical parliamentary democracy to its limits, offering examples such as how living in a filter bubble and debating with political bots is profoundly changing democratic communication, making it more emotional, hysterical, even and less rational. It also explores how classical democracy involves long, slow thinking and decision processes which don't fit to the ever-increasing speed of the digital world and examines the technical developments some fear will lead to governance by algorithms. In the digitalised world, democracy no longer functions as it has in the past. This does not mean waving goodbye to democracy; instead, we need to reinvent it. How this could work is the central theme of this book.

**The Language of Nation-State Building in Late Qing China** Qing Cao, 2023-01-31 The Language of Nation-State Building in Late Qing China investigates the linguistic and intellectual roots of China's modern transformation by presenting a systematic study of the interplay between language innovation and socio-political upheavals in the final decade of the Qing Dynasty. This book examines the formations, internal tensions, and promotion of such macroconcepts as nation, people, guomin, nation, minzu, society, qun, state, guojia, and revolution, as novel ideas borrowed from Europe but mediated through Meiji Japan. Using corpus-based discourse analysis of the full-text corpus (4.2 million words) of the two most influential periodicals, Xinmin Congbao and Minbao, this book scrutinises the multi-faceted formulations of these concepts and their impact. It underscores the adaptation and appropriation of European post-enlightenment values to the socio-political conditions of late Qing society. The analysis centres on the epic debate (1905-7) between these two periodicals that offered two distinctive visions of future China. Comparable to the great eighteenth-century debate between Edmund Burke and Thomas Paine on the French Revolution, the Chinese debate has hitherto attracted little scholarly attention outside China. Yet it not only turned the tidal wave of public opinion against the Manchu monarchy and contributed to its downfall in 1911, it has also given rise to a radical undercurrent of intellectual thinking whose ramifications have been keenly felt throughout twentieth-century China. This book represents the first study in English on this press debate that contributes significantly to the intellectual foundation of modern China. This book will be useful and relevant to academics, postgraduate students, and final-year undergraduate students in the field of Chinese studies and anyone interested in the role of language in shaping modern intellectual history.

Nationalism and Minority Identities in Islamic Societies Maya Shatzmiller, 2005-04-29 The essays focus on identity formation in five minority groups Copts in Egypt Baha is and Christians in Pakistan Berbers in Algeria and Morocco and Kurds in Turkey and Iraq While every minority community is distinctive the experiences of these groups show that a state s authoritarian rule uncompromising attitude towards expressions of particularism and failure to offer tools for inclusion are all responsible for the politicization and radicalization of minority identities The place of Islam in this process is complex while its initial pluralistic role was transformed through the creation of the modern nation state the radicalization of society in turn radicalized and politicized minority identities Minority groups though at times possessing a measure of political autonomy remain intensely vulnerable
