Visions of Poverty Robert Asen, 2012-01-01 Images of poverty shape the debate surrounding it In 1996 then President Bill Clinton signed welfare reform legislation repealing the principal federal program providing monetary assistance to poor families Aid to Families with Dependent Children AFDC With the president s signature this originally non controversial program became the only title of the 1935 Social Security Act to be repealed The legislation culminated a retrenchment era in welfare policy beginning in the early 1980s To understand completely the welfare policy debates of the last half of the 20th Century the various images of poor people that were present must be considered Visions of Poverty explores these images and the policy debates of the retrenchment era recounting the ways in which images of the poor appeared in these debates relaying shifts in images that took place over time and revealing how images functioned in policy debates to advantage some positions and disadvantage others Looking to the future Visions of Poverty demonstrates that any future policy agenda must first come to terms with the vivid disabling images of the poor that continue to circulate In debating future reforms participants whose ranks should include potential recipients ought to imagine poor people anew This ground breaking study in policymaking and cultural imagination will be of particular interest to scholars in rhetorical studies political science history and public policy

Civitas by Design Howard Gillette, Jr., 2011-06-06 Since the end of the nineteenth century city planners have aspired not only to improve the physical living conditions of urban residents but also to strengthen civic ties through better design of built environments From Ebenezer Howard and his vision for garden cities to today s New Urbanists these visionaries have sought to deepen civitas or the shared community of citizens In Civitas by Design historian Howard Gillette Jr takes a critical look at this planning tradition examining a wide range of environmental interventions and their consequences over the course of the twentieth century As American reform efforts moved from progressive idealism through the era of government urban renewal programs to the rise of faith in markets planners attempted to cultivate community in places such as Forest Hills Gardens in Queens New York Celebration Florida and the post Katrina Gulf Coast Key figures including critics Lewis Mumford and Oscar Newman entrepreneur James Rouse and housing reformer Catherine Bauer introduced concepts such as neighborhood units pedestrian shopping malls and planned communities that were implemented on a national scale Many of the buildings landscapes and infrastructures that planners

envisioned still remain but frequently these physical designs have proven insufficient to sustain the ideals they represented Will contemporary urbanists efforts to join social justice with environmentalism generate better results Gillette places the work of reformers and designers in the context of their times providing a careful analysis of the major ideas and trends in urban planning for current and future policy makers

City of Gods R. Scott Hanson, 2021-05-20 This study of a New York neighborhood s remarkable religious diversity deserves a place alongside Robert Orsi s *The Madonna of 115th Street* Publishers Weekly starred review Known locally as the birthplace of American religious freedom Flushing Queens in New York City is now so diverse and densely populated that it s become a microcosm of world religions *City of Gods* explores the history of Flushing from the colonial period to the aftermath of September 11 2001 spanning the origins of the settlement called Vlissingen and early struggles between Quakers Dutch authorities Anglicans African Americans Catholics and Jews to the consolidation of New York City in 1898 two World s Fairs and finally the Immigration Act of 1965 and the arrival of Hindus Sikhs Muslims Buddhists and Asian and Latino Christians A synthesis of archival sources oral history and ethnography *City of Gods* is a thought provoking study of religious pluralism Using Flushing as the backdrop to examine America s contemporary religious diversity and what it means for the future of the United States R Scott Hanson explores both the possibilities and limits of pluralism Hanson argues that the absence of widespread religious violence in a neighborhood with such densely concentrated diversity suggests that there is no limit to how much pluralism a pluralist society can stand The book is set against two interrelated questions how and where have the different religious and ethnic groups in Flushing associated with others across boundaries over time and when has conflict or cooperation arisen Perhaps the most extreme example of religious and ethnic pluralism in the world Flushing is an ideal place to explore how America s long experiment with religious freedom and pluralism began and continues *City of Gods* reaches far beyond Flushing to all communities coming to terms with immigration religion and ethnic relations raising the question of whether Flushing will come together in new and lasting ways to build bridges of dialogue or further fragment into a Tower of Babel A delightful journey through American religious history and into the future as witnessed in the streets of what the author says is the most religiously diverse community anywhere America

The Power of Culture in City Planning Tom Borrup, 2020-11-29 The *Power of Culture in City Planning* focuses on human diversity strengths needs and ways of living together in geographic communities The book turns attention to the anthropological definition of culture encouraging planners in both urban and cultural planning to focus on characteristics of humanity in all their variety It calls for a paradigm shift re positioning city planners base maps to start with a richer understanding of human cultures Borrup argues for cultural master plans in parallel to transportation housing parks and other specialized plans while also changing the approach of city comprehensive planning to put people or users first rather than land uses as does the dominant practice Cultural plans as currently conceived are not sufficient to help cities keep pace with dizzying impacts of globalization immigration and rapidly changing

cultural interests Cultural planners need to up their game and enriching their own and city planners cultural competencies is only one step Both planning practices have much to learn from one another and already overlap in more ways than most recognize This book highlights some of the strengths of the lesser known practice of cultural planning to help forge greater understanding and collaboration between the two practices empowering city planners with new tools to bring about more equitable communities This will be an important resource for students teachers and practitioners of city and cultural planning as well as municipal policymakers of all stripes *In Defense of Housing* Peter Marcuse, David Madden, 2024-08-27

In every major city in the world there is a housing crisis How did this happen and what can we do about it Everyone needs and deserves housing But today our homes are being transformed into commodities making the inequalities of the city ever more acute Profit has become more important than social need The poor are forced to pay more for worse housing Communities are faced with the violence of displacement and gentrification And the benefits of decent housing are only available for those who can afford it *In Defense of Housing* is the definitive statement on this crisis from leading urban planner Peter Marcuse and sociologist David Madden They look at the causes and consequences of the housing problem and detail the need for progressive alternatives The housing crisis cannot be solved by minor policy shifts they argue Rather the housing crisis has deep political and economic roots and therefore requires a radical response Double Exposure Jean M Hartman, Samuel D Bradley, Julian Bond, 2016-09-16

Leading thinkers and activists discuss the intersection of race and poverty The essays are organized around seven key topics including affirmative action the permanence of racism thesis the use and utility of racial and ethnic categories multiculturalism and the underclass debate **The Dying City** Brian L. Tochtermann, 2017-05-08

In this eye opening cultural history Brian Tochtermann examines competing narratives that shaped post World War II New York City As a sense of crisis rose in American cities during the 1960s and 1970s a period defined by suburban growth and deindustrialization no city was viewed as in its death throes more than New York Feeding this narrative of the dying city was a wide range of representations in film literature and the popular press representations that ironically would not have been produced if not for a city full of productive possibilities as well as challenges Tochtermann reveals how elite culture producers planners and theorists and elected officials drew on and perpetuated the fear of death to press for a new urban vision It was this narrative of New York as the dying city Tochtermann argues that contributed to a burgeoning and broad anti urban political culture hostile to state intervention on behalf of cities and citizens Ultimately the author shows that New York's decline and the decline of American cities in general was in part a self fulfilling prophecy bolstered by urban fear and the new political culture nourished by it In Search of Respect Philippe I. Bourgois, 2003

Puzzling Neighbourhood Effects Wenda Doff,2010 Like other West European countries the Netherlands are facing a growing uneasiness about its changing demographics It is within this context that animated discussions concerning immigrant neighbourhoods dominate The general opinion is that living in such neighbourhoods hinders the integration of immigrants into Dutch society This book contributes to the academic and policy debate by not only examining the effects of ethnic concentration but also by finding out how people are sorted into neighbourhoods Bringing together different bodies of literature this book offers a more holistic vi
