People And Pixels:

People and Pixels National Research Council,Division of Behavioral and Social Sciences and Education,Board on Environmental Change and Society,Committee on the Human Dimensions of Global Change,1998-05-21 Space based sensors are giving us an ever closer and more comprehensive look at the earth s surface they also have the potential to tell us about human activity This volume examines the possibilities for using remote sensing technology to improve understanding of social processes and human environment interactions Examples include deforestation and regrowth in Brazil population environment interactions in Thailand ancient and modern rural development in Guatemala and urbanization in the United States as well as early warnings of famine and disease outbreaks The book also provides information on current sources of remotely sensed data and metadata and discusses what is involved in establishing effective collaborative efforts between scientists working with remote sensing technology and those working on social and environmental issues   **People and Pixels** National Research Council (U.S.). Committee on the Human Dimensions of Global Change,1996   *Land Change Science* Garik Gutman,Anthony C. Janetos,Christopher O. Justice,Emilio F. Moran,John F. Mustard,Ronald R. Rindfuss,David Skole,Billy Lee Turner II,Mark A. Cochrane,2012-03-24 This volume is a synthesis of the NASA funded work under the Land Cover and Land Use Change Program Hundreds of scientists have worked for the past eight years to understand one of the most important forces that is changing our planet human impacts on land cover that is land use Its contributions span the natural and the social sciences and apply state of the art techniques for understanding the earth satellite remote sensing geographic information systems modeling and advanced computing It brings together detailed case studies regional analyses and globally scaled mapping efforts This is the most organized effort made to understand the dominant force that has been responsible for changing the Earth s biosphere Audience This publication will be of interest to students scientists and policy makers This volume includes a CD ROM containing full color images of a selection of illustrations which are printed in black and white in the book   **Fun with Algorithms** Evangelos Kranakis,DANNY KRIZANC,Flaminia Luccio,2012-05-31 This book constitutes the refereed proceedings of the 6th International Conference FUN 2012 held in June 2012 in Venice Italy The 34 revised full papers were carefully reviewed and selected from 56 submissions They feature a large variety of topics in the field of the use design and analysis of algorithms and data structures focusing on results that provide amusing witty but nonetheless original and scientifically profound contributions to the area   **Practical handbook for agricultural land cover mapping in the Lao People's Democratic Republic** Food and Agriculture Organization of the United Nations ,Ministry of Agriculture and Forestry, Lao People's Democratic Republic,2020-09-01 This handbook presents the detailed steps for national agricultural land cover mapping conducted with limited resources and budget from design to final validation and production It covers the technical aspects of 1 selection and preprocess of satellite imagery both optical and radar 2 definition of a land cover legend using international standards 3 the integration with other existing information as

well as the analysis of such database in order to assign a thematic classification 4 the interpretation 5 the accuracy assessment and 6 the final packaging and publication of results The handbook focuses on mapping agricultural land in a complex landscape such as the one found in Lao PDR where atmospheric conditions topographic effects and management makes the classification challenging The handbook also presents practical examples of the team software and skill set required to develop a national land cover dataset The objective of the document is to provide a working manual to other national teams willing to develop a land cover mapping programme   *Cooperative Studies Between the United States of America and the People's Republic of China on Applications of Remote Sensing to Surveying and Mapping* Donald T. Lauer,Liangcai Chu,1992   *Pervasive Digital Services for People's Well-Being, Inclusion and Sustainable Development* Achilleas Achilleos,Stefano Forti,George Angelos Papadopoulos,Ilias Pappas,2025-09-27 This book constitutes the refereed proceedings of the 24th IFIP WG 6 11 Conference on e Business e Services and e Society I3E 2025 held in Limassol Cyprus during September 9 11 2025 The 34 full papers presented in this volume were carefully reviewed and selected from 73 submissions They were organized in topical sections as follows Smart Public Services and Technologies AI driven Services and Business Innovation Decision making and Digital Risk Management Ethics Well being and Sustainability in Digital Society Systematic Reviews and Comparative Studies   **An individual-centered approach to visualize people's opinions and demographic informationc** Wanda Baltzer,Theresa Hradilak,Lara Pfennigschmidt,Luc Maurice Prestin,Moritz Spranger,Simon Stadlinger,Leo Wendt,Jens Lincke,Patrick Rein,Luke Church,Robert Hirschfeld,2021-11-05 The noble way to substantiate decisions that affect many people is to ask these people for their opinions For governments that run whole countries this means asking all citizens for their views to consider their situations and needs Organizations such as Africa s Voices Foundation who want to facilitate communication between decision makers and citizens of a country have difficulty mediating between these groups To enable understanding statements need to be summarized and visualized Accomplishing these goals in a way that does justice to the citizens voices and situations proves challenging Standard charts do not help this cause as they fail to create empathy for the people behind their graphical abstractions Furthermore these charts do not create trust in the data they are representing as there is no way to see or navigate back to the underlying code and the original data To fulfill these functions visualizations would highly benefit from interactions to explore the displayed data which standard charts often only limitedly provide To help improve the understanding of people s voices we developed and categorized 80 ideas for new visualizations new interactions and better connections between different charts which we present in this report From those ideas we implemented 10 prototypes and two systems that integrate different visualizations We show that this integration allows consistent appearance and behavior of visualizations The visualizations all share the same main concept representing each individual with a single dot To realize this idea we discuss technologies that efficiently allow the rendering of a large number of these dots With these visualizations direct interactions with representations of

individuals are achievable by clicking on them or by dragging a selection around them This direct interaction is only possible with a bidirectional connection from the visualization to the data it displays We discuss different strategies for bidirectional mappings and the trade offs involved Having unified behavior across visualizations enhances exploration For our prototypes that includes grouping filtering highlighting and coloring of dots Our prototyping work was enabled by the development environment Lively4 We explain which parts of Lively4 facilitated our prototyping process Finally we evaluate our approach to domain problems and our developed visualization concepts Our work provides inspiration and a starting point for visualization development in this domain Our visualizations can improve communication between citizens and their government and motivate empathetic decisions Our approach combining low level entities to create visualizations provides value to an explorative and empathetic workflow We show that the design space for visualizing this kind of data has a lot of potential and that it is possible to combine qualitative and quantitative approaches to data analysis   Computer Vision -- ECCV 2006 Aleš Leonardis,Horst Bischof,Axel Pinz,2006-07-25 The four volume set comprising LNCS volumes 3951 3952 3953 3954 constitutes the refereed proceedings of the 9th European Conference on Computer Vision ECCV 2006 held in Graz Austria in May 2006 The 192 revised papers presented were carefully reviewed and selected from a total of 811 papers submitted The four books cover the entire range of current issues in computer vision The papers are organized in topical sections on recognition statistical models and visual learning 3D reconstruction and multi view geometry energy minimization tracking and motion segmentation shape from X visual tracking face detection and recognition illumination and reflectance modeling and low level vision segmentation and grouping   **Geography in America at the Dawn of the 21st Century** Gary L. Gaile,Cort J. Willmott,2005 Geography in America at the Dawn of the 21st Century surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial Geography in America was published in 1989 and has become a benchmark reference of American geographical research during the 1980s This latest volume is completely new and features a preface written by the eminent geographer Gilbert White   Urban Remote Sensing Xiaojun X. Yang,2021-10-11 Urban Remote Sensing The second edition of Urban Remote Sensing is a state of the art review of the latest progress in the subject The text examines how evolving innovations in remote sensing allow to deliver the critical information on cities in a timely and cost effective way to support various urban management activities and the scientific research on urban morphology socio environmental dynamics and sustainability Chapters are written by leading scholars from a variety

of disciplines including remote sensing GIS geography urban planning environmental science and sustainability science with case studies predominately drawn from North America and Europe A review of the essential and emerging research areas in urban remote sensing including sensors techniques and applications especially some critical issues that are shifting the directions in urban remote sensing research Illustrated in full color throughout including numerous relevant case studies and extensive discussions of important concepts and cutting edge technologies to enable clearer understanding for non technical audiences Urban Remote Sensing Second Edition will be of particular interest to upper division undergraduate and graduate students researchers and professionals working in the fields of remote sensing geospatial information and urban environmental planning **Advanced Concepts for Intelligent Vision Systems** Sebastiano Battiato,Jacques Blanc-Talon,Giovanni Gallo,Wilfried Philips,Dan Popescu,Paul Scheunders,2015-10-07 This book constitutes the thoroughly refereed proceedings of the 16th International Conference on Advanced Concepts for Intelligent Vision Systems ACIVS 2015 held Catania Italy in October 2015 The 76 revised full papers were carefully selected from 129 submissions Acivs 2015 is a conference focusing on techniques for building adaptive intelligent safe and secure imaging systems The focus of the conference is on following topic low level Image processing video processing and camera networks motion and tracking security forensics and biometrics depth and 3D image quality improvement and assessment classification and recognition multidimensional signal processing multimedia compression retrieval and navigation **Universal Access in Human-Computer Interaction. Methods, Technologies, and Users** Margherita Antona,Constantine Stephanidis,2018-07-09 This two volume set LNCS 10907 and 10908 constitutes the refereed proceedings of the 12th International Conference on Universal Access in Human Computer Interaction UAHCI 2018 held as part of HCI International 2018 in Las Vegas NV USA in July 2018 The total of 1170 papers and 195 posters included in the 30 HCII 2018 proceedings volumes was carefully reviewed and selected from 4373 submissions The 49 papers presented in this volume were organized in topical sections named design for all accessibility and usability alternative I O techniques multimodality and adaptation non visual interaction and designing for cognitive disabilities **Disaster Intelligent Perception and Emergency Command of Power Grid** Zhen Yu,Jie Feng,Shiyang Tang,Zeyu Liu,Yiran Yan,Na Luo,2023-11-17 This open access book addresses the current technical problems of low efficiency of emergency site information collection lack of flexibility of emergency information interaction lack of fusion analysis technology and disaster loss prediction model and low intelligence of emergency auxiliary decision making The content contains research on multiple information collection technology of power grid disaster loss fusion analysis and prediction technology of power grid disaster loss information and real time information interaction technology between emergency site and command center in this work This book illustrates the process of developing a prototype system for grid disaster perception and emergency command which realizes the functions of grid disaster perception and emergency auxiliary decision making and visualization command The prototype intelligent

perception and emergency command system for power grid disasters has been piloted in several units It provided support for disaster loss prediction disaster damage perception and emergency command auxiliary decision making in the earthquake in Sichuan China as well as the heavy rainfall in Zhejiang China and Typhoon No 9 Lupi that registered in Fujian China which significantly improved the emergency disposal Work efficiency <u>Recent Advances in Remote Sensing and Geoinformation Processing for Land Degradation Assessment</u> Achim Roeder,Joachim Hill,2009-04-23 Land degradation and desertification are amongst the most severe threats to human welfare and the environment as they affect the livelihoods of some 2 billion people in the worlds drylands and they are directly connected to pressing global environmental problems such as the loss of biological diversity or global climate change Strategies to co **Land-Use and Land-Cover Change** Eric F. Lambin,Helmut J. Geist,2008-01-08 This book presents recent estimates on the rate of change of major land classes Aggregated globally multiple impacts of local land changes are shown to significantly affect central aspects of Earth System functioning The book offers innovative developments and applications in the fields of modeling and scenario construction Conclusions are also drawn about the most pressing implications for the design of appropriate intervention policies **Ancient Mesoamerican Population History** Adrian S.Z. Chase,Arlen F. Chase,Diane Z. Chase,2024-05-07 This book critically re examines Mesoamerican archaeological approaches to estimating populations associated with ancient cities settlement systems and regions Archaeological data and lidar are both employed to demonstrate how complex ancient Mesoamerican societies were and how they changed over time **People of the State of Illinois V. McClanahan** ,1999 **Flexible Web Design** Zoe Mickley Gillenwater,2010-04-16 Liquid or fluid layouts change width based on the user s unique device viewing size These types of layouts have always been possible with tables but offer new design challenges as well as opportunities when built with CSS This book for experienced Web designers with some CSS experience outlines how to do this successfully Designers will learn the benefits of flexible layouts and when to choose a liquid elastic or hybrid design They will learn not only how to build a liquid layout from scratch using standards compliant and cross browser compatible X HTML and CSS but will also learn how to design and slice their graphic comps in a way that makes flexible design achievable This book will show designers that flexible layouts do not have to be visually boring or difficult to build when planned and built correctly Even those who do not intend to build liquid layouts can use the concepts and techniques taught in this book to improve their fixed width CSS designs because they will learn how to design for the inherent flexibility of the web medium instead of the rigid qualities of print media or table grid based layouts **Graphic Design Concepts** Jacobs, Marvin,2004
