People And Spaces A View Of History Through Architecture:

People and Spaces Anita Brooks, 1979 Space and the Eighteenth-Century English Novel Simon Varey, 1990-07-27 In this challenging and illustrated study first published in 1990 Simon Varey relates the idea of space in the major novels of Defoe Fielding and Richardson to its use in the theory and practice of eighteenth century architecture Concepts of divine design expressed in the work of philosophers and theologians introduced an ideological element to the notion of space which gave it a heightened significance in contemporary thought Professor Varey's central argument is that space becomes a political instrument used to establish conformity assert power and give form to the aspirations of social classes He draws on a wide range of architectural books both English and European and on the example of Bath focusing in particular on its chief architect in the eighteenth century John Wood The discussion of novels such as Robinson Crusoe Tom Jones and Clarissa examines narrative as a form of spatial design the use of architectural imagery to describe people and the political control of social space **Architecture of Threshold Spaces** Laurence Kimmel, 2021-12-30 This book explores the relationship between architecture and philosophy through a discussion on threshold spaces linking public space with publicly accessible buildings It explores the connection between exterior and interior and how this creates and affects interactions between people and the social dynamics of the city Building on an existing body of literature the book engages with critical philosophy and discusses how it can be applied to architecture In a similar vein to Walter Benjamin's descriptions of the Parisian Arcades in the nineteenth century the book identifies the conditions under which thresholds reveal and impact social life It utilises a wide range of illustrated international case studies from architects in Japan Norway Finland France Portugal Italy the USA Australia Mexico and Brazil Within the examples thresholds become enhancers of social interactions and highlight broader socio political contexts in public and private space Architecture of Threshold Spaces is an enlightening contribution to knowledge on contemporary architecture politics and philosophy for students academics and architects **The Shaping of Our World** W. A. Douglas Jackson, 1985-01-18 Offers an assessment of many of the facts of cultural geography as exhibited in the diversity of human activity in a lively readable manner Describes how settlement and occupance territorial organization economic endeavors and communication have affected the earth's surface Also focuses on the way in which mankind has sought to create an environment or milieu that reflects human imagination needs and goals Draws on a wide array of examples from the past as well as the present of human experience in the shaping of the world Written for all undergraduates majoring in geography **Baghdad: An Urban History through the Lens of Literature** Iman Al-Attar, 2018-09-03 In recent years Baghdad has been viewed as a battleground for political conflicts this interpretation has heavily influenced writings on the city This book moves away from these perspectives to present an interdisciplinary exploration into the urban history of Baghdad through the lens of literature It argues that urban literature is an effective complementary source to conventional historiography using in depth analysis of texts poems and historical narratives of non

monumental urban spaces to reveal an underexamined facet of the city's development. The book focuses on three key themes: spatial, nostalgic and reflective, to offer a new approach to the study of Baghdad's history with a view to establishing and informing further strategies for future urban developments. Beginning with the first planned city in the eighth century, it looks at the urban transformations that influenced building trends and architectural styles until the nineteenth century. It will appeal to academics and researchers in interdisciplinary fields such as architecture, urban history, Islamic studies and Arabic literature.

The Sense of Place Fritz Steele, 1981. Discusses the effect of one's surroundings on expectations, experiences and satisfaction levels. Dust jacket.

Creating Through Mind and Emotions Mário Ming Kong, Maria do Rosário Monteiro, Maria João Pereira Neto, 2022-07-01. The texts presented in *Proportion, Harmonies and Identities PHI Creating Through Mind and Emotions* were compiled to establish a multidisciplinary platform for presenting interacting and disseminating research. This platform also aims to foster the awareness and discussion on *Creating Through Mind and Emotions* focusing on different visions relevant to Architecture, Arts and Humanities, Design and Social Sciences and its importance and benefits for the sense of identity both individual and communal. The idea of *Creating Through Mind and Emotions* has been a powerful motor for development since the Western Early Modern Age. Its theoretical and practical foundations have become the working tools of scientists, philosophers and artists who seek strategies and policies to accelerate the development process in different contexts.

A People's History of the Farmers' Movement, 2020-2021 Shamsheer Singh, Sabah Siddiqui, 2024-09-30. In the annals of India's history, a monumental uprising unfolded in 2020, echoing the resilience and coming together of large sections of its agrarian base. Instigated by the contentious farm laws of 2020, the Farmers Movement burgeoned into a year-long saga of protest and perseverance, ending only in December 2021 after the passing of the Farm Laws Repeal Bill 2021 by the Indian Parliament. From the initial demand for law repeal to the multifaceted growth of the movement, the book traces the journey of the Farmers Movement as each essay dissects the socio-political dynamics, cultural nuances and mass solidarity that underpinned the protests, including focused analyses from Delhi, Punjab, Haryana, Uttar Pradesh, Rajasthan, Maharashtra and the Sikh diaspora in the United Kingdom. This anthology chronicles the ebb and flow of a nation's spirit, encapsulating the symbiotic relationship between theory and praxis, between change and continuity. It serves as a testament to the power of collective resistance and a roadmap for future struggles, ensuring that the legacy of the Farmers Movement endures beyond the pages of history. This volume is an interdisciplinary project and will be of interest to scholars from diverse fields such as economics, sociology, public policy, political science, history, political geography, gender studies, cultural studies, international studies, architecture, media studies, psychology and ethnomusicology.

Transformations and the Architecture of Additions Rodrigo Perez de Arce, 2014-08-07 Rodrigo Perez de Arce s essay *Urban Transformations and Architectural Additions* was published during the formative stages of Post Modernism at the point where theory was becoming seriously established Jencks first essays formalising the term Post Modernism in architecture and the revised *Learning from Las Vegas* were published the previous year In planning terms modernism had become associated with comprehensive redevelopment and forms of urban organisation that ignored context history and any sense of tradition De Arce considered the essential nature of buildings and the richness of historic urban form and explored how robust that essence was over time He looked at the value of essential remnants and rich complexities in maintaining a sense of continuity and relevance Having explored the adaptation process in history de Arce went on to see how such a process might be simulated in contemporary cities with modern buildings using additions and layers to change them from objects in infinite windswept space to being part of a rich urban fabric which described urban place To do this he used concrete examples housing schemes by James Stirling new government centres in Chandigarh and Dacca and more prosaic 60 s housing blocks The paper had a fundamental influence on the way that architects and planners thought about the nature of cities as dynamic organisms that were tangible to human beings completely opposite to the systems thinking of the time It contributed to ideas about the importance of street place and city block which influenced so much recent regeneration practice As we enter a phase of development where the reuse and adaptation of existing buildings is becoming paramount

from both an economic and sustainable point of view Perez de Arce's paper gives important insights into how to think about the process positively
