It explains how China has adapted and refined its modernization principles over time. The book is ideal for academics, researchers, and students in sociology, political science, and economics, as well as policymakers and professionals in international development. The content is accessible yet detailed, catering to both new and seasoned scholars. With insightful analysis and practical implications, the book is a significant contribution to the study of modernization and social development. Mobs Nancy van Deusen, Leonard Michael Koff, 2011-11-25 Mobs are complex, often an enigma. The topic of Mobs presented here serves as a means to address not only an important historical as well as present consideration but to provide multiple disciplinary methods and viewpoints bringing the past into the present. *Translations on People's Republic of China*, 1967-05 *The Wisdom of the Gods* Herbert Dennis Bradley, 1925 *The Industrialisation of Soviet Russia 3: The Soviet Economy in Turmoil 1929-1930* R. W. Davies, 1989-05-05 In 1929-30, the spinal year of the first five-year plan, a vast investment programme began the transformation of the Soviet Union from a peasant country into a great industrial power. This book, the third part of *The Industrialisation of Soviet Russia*, re-examines the breakdown of the mixed economy. In those days of heroism and enthusiasm, hunger and repression, crucial Soviet economic and political institutions were established and are only now being effectively challenged by Gorbachev's revolution. While complementing the previous two volumes of this author's work, the book is designed to be read independently. It sheds new light on a dramatic moment in Soviet history and in the formation of the Soviet system. *The Civil War and the Summer of 2020* Hilary N. Green, Andrew L. Slap, 2024-04-02 Investigates how Americans have remembered violence and resistance since the Civil War, including Confederate monuments, historical markers, college classrooms, and history books. George Floyd's murder in the summer of 2020 sparked a national reckoning for the United States that had been 400 years in the making. Millions of Americans took to the streets to protest both the murder and the centuries of systemic racism that already existed among European colonists but transformed with the arrival of the first enslaved African Americans in 1619. The violence needed to enforce that systemic racism for all those years, from the slave driver's whip to state-sponsored police brutality, attracted the immediate attention of the protesters. The resistance of the protesters echoed generations of African Americans resisting the violence and oppression of white supremacy. Their opposition to violence soon spread to other aspects of systemic racism, including a cultural hegemony built on and reinforcing white supremacy. At the heart of this white supremacist culture is the memory of the Civil War era when in 1861 8 million white Americans revolted against their country to try to safeguard the enslavement of 4 million African Americans. The

volume has three interconnected sections that build on one another The first section Violence explores systemic racism in the Civil War era and now with essays on slavery policing and slave patrols The second section titled Resistance shows how African Americans resisted violence for the past two centuries with essays discussing matters including self emancipation and African American soldiers The final section Memory investigates how Americans have remembered this violence and resistance since the Civil War including Confederate monuments and historical markers This volume is intended for nonhistorians interested in showing the intertwined and longstanding connections between systemic racism violence resistance and the memory of the Civil War era in the United States that finally exploded in the summer of 2020
