Maloney, 1998 Arising initially from a conference the papers published here have been integrated into book form to provide information on human activities and the tropical rainforest in the past and present and on the possible future of the rainforest in a unique way Other books have considered some but not all of these themes however none has stressed the continuity of change over time and its possible outcome for the people of the forest as well as for the forest itself Because of the approach taken this book should appeal across traditional disciplinary boundaries Indeed a prime aim has been to suggest that rainforest because of its complexity and the complexity of people rainforest relationships throughout time deserves study from a broad perspective This book poses more questions than answers about the rainforest and it is hoped that it will encourage readers to think about the rainforest in a wider way than hitherto This book is aimed at geographers physical and human social anthropologists archaeologists pedologists foresters and tropical botanists and will be of value to graduates of various disciplines setting out to research the rainforest

The Routledge Handbook of Bioarchaeology in Southeast Asia and the Pacific Islands Marc Oxenham, Hallie Buckley, 2015-11-19 In recent years the bioarchaeology of Southeast Asia and the Pacific islands has seen enormous progress This new and exciting research is synthesised

contextualised and expanded upon in *The Routledge Handbook of Bioarchaeology in Southeast Asia and the Pacific Islands*. The volume is divided into two broad sections one dealing with mainland and island Southeast Asia and a second section dealing with the Pacific islands. A multi scalar approach is employed to the bio social dimensions of Southeast Asia and the Pacific islands with contributions alternating between region and or site specific scales of operation to the individual or personal scale. The more personal level of osteobiographies enriches the understanding of the lived experience in past communities. Including a number of contributions from sub disciplinary approaches tangential to bioarchaeology the book provides a broad theoretical and methodological approach. Providing new information on the globally relevant topics of farming population mobility subsistence and health no other volume provides such a range of coverage on these important themes.
