Hough, 2004-06-23 This book examines the failure of economic reform in Russia since 1991 when Boris Yeltsin proclaimed his commitment to economic stabilization privatization and price liberalization

Optimism over Russia's market reforms vanished with the crash of August 1998 when the ruble lost over 70 percent of its value and banks defaulted on their debts and forward currency contracts. Contrary to Yeltsin's reform promises, the Russian economy of the 1990s more closely resembled a Soviet model than a market-driven one. *The Logic of Economic Reform in Russia* illuminates the general problems of establishing market economies in settings where the institutional system to support the market has not had decades to develop. Suggesting that corruption may be associated with growth in the early stages of capitalism, Jerry F. Hough argues that the disappointing results of Yeltsin's reform efforts were not the product of Russian culture or history but the logical consequences of rational men responding to the incentive system created by economic reform. **Monthly Catalogue, United States Public Documents**, 1995 **Monthly Catalog of United States Government Publications**, 1995 **Multinational Enterprises and the Law** Peter Muchlinski, 2021-02-18

Multinational Enterprises and the Law is the only comprehensive contemporary and interdisciplinary account of the techniques used to regulate multinational enterprises (MNEs) at the national, regional, and multilateral levels. In addition, it considers the effects of corporate self-regulation and the impact of civil society and community groups upon the development of the legal order in this area. The book has been thoroughly revised and updated for this third edition, making it a definitive reference work for students, researchers, and practitioners of international economic law, business, corporate, and commercial law, development studies, and international politics. Split into four parts, the book first deals with the conceptual basis for MNE regulation. It explains the growth of MNEs, their business and legal forms, and the relationship between them and the effects of a globalized economy and society now increasingly challenged by recently revived nationalist economic policies upon the evolution of regulatory agendas in the field. In addition, the limits of national and regional jurisdiction over MNE activities are considered a question that arises throughout the specialized areas of regulation covered in the remainder of the book. Part II covers the main areas of economic regulation, including controls over and the liberalization of entry and establishment, tax, company, and competition law, and the impact of intellectual property rights on technology diffusion and transfer. A specialized chapter on the regulation of multinational banks in the wake of the global financial crisis is new to this edition. Part III introduces the social dimension of MNE regulation, covering labour rights, human rights, and environmental issues. Finally, Part IV deals with the contribution of international investment law to MNE regulation and to the control of investment risks, covering the main provisions found in international investment agreements, their interpretation by international tribunals, the process of investor-state arbitration, and how concerns over these developments are leading to reform proposals.
