Perceived Control Motivation And Coping:

Perceived Control, Motivation, & Coping Ellen A. Skinner, 1995-02-08 At every point in the life span individual differences in a sense of control are strong predictors of motivation coping success and failure in a wide range of life domains What are the origins of these individual differences how do they develop and what are the mechanisms by which they exert such influence on psychological functioning This book draws on theories and research covering key control constructs including self efficacy learned helplessness locus of control and attribution theory Ellen A Skinner discusses such issues as the origins of control in social interactions environmental features that promote or undermine control developmental change in the mechanisms by which experiences of control have their effects on action and the implications for intervening into the competence system including interventions for people in uncontrollable circumstances Written at a level appropriate for upper division undergraduates the book can serve as a supplement to the social and personality development course as well as a core text for motivation educational psychology or clinical courses at the graduate level This book won't be the first one on the topic but it will be the first one that professionals and graduate students turn to whenever they want a definitive opinion on complex questions of control or an idea for cutting edge research on the topic of motivation coping and control

Handbook of Self-determination Research Edward L. Deci, Richard M. Ryan, 2004 Over the past twenty years an increasing number of researchers from various universities have been investigating motivational issues underlying the self regulation of behavior Using either Self Determination Theory or closely related theoretical perspectives these researchers have performed laboratory experiments as well as field studies in a variety of real world settings In April 1999 thirty of these researchers convened at the University of Rochester to present their work share ideas and discuss future research directions This book is an outgrowth of that important and fascinating conference It summarizes the research programs of these social personality clinical developmental and applied psychologists who have a shared belief in the importance of self determination for understanding basic motivational processes and for solving pressing real world problem Midwest **Advances in Sport**

Psychology Thelma S. Horn, 2008 This third edition presents a thorough review of the literature and terminology in key topic areas The clear explanation of potential research directions and the list of contributors make this a must have book for students of sport psychology

Perceived Control John W. Reich, Frank J. Infurna, 2017 Leading scholars in perceived control research review the important historical foundations and most recent developments in key areas of control theory research and practice Their reviews provide insights into how this important concept became so widely influential and project how it will continue to generate new knowledge in the future **Self-Efficacy** Ralf Schwarzer, 2014-06-11 The goal of this book is to illustrate the change in emphasis during the 1980s from one dominated by a behaviouristic perspective to one much more cognitive in its emphasis It is aimed at research psychologists and graduate level psychology students

Psychological Aspects of Geographical Moves Miranda van Tilburg, Ad Vingerhoets, 2007-04 Mobility of mankind has

increased enormously in the past few decades People leave their homes and native countries for business and study for vacation or to flee from unsafe conditions like wars and natural disasters In all cases the sojourner faces a dual challenge of breaking with the familiar home environment and adjusting to new surroundings This book deals with the psychological and health consequences of leaving the familiar home and the process of creating a new one The focus is mainly on acculturation stress and homesickness which both are relevant to those who travel Acculturation refers to the process and outcome of a person's encounter with and adaptation to a culturally new and different environment Homesickness is defined as a depression like reaction to leaving one's home The contributions in this book present empirical data as well as theoretical and conceptual discussions Causes consequences moderating variables and theoretical explanations are discussed Both short term e.g. vacations and long term e.g. immigration separations from home receive attention By combining these different but related topics this book provides a valuable overview for researchers teachers students and professionals working with people who present with problems related to migration or traveling

Handbook of Research on Student Engagement

Sandra L. Christenson, Amy L. Reschly, CATHY WYLIE, 2012-02-23 For more than two decades the concept of student engagement has grown from simple attention in class to a construct comprised of cognitive emotional and behavioral components that embody and further develop motivation for learning Similarly the goals of student engagement have evolved from dropout prevention to improved outcomes for lifelong learning This robust expansion has led to numerous lines of research across disciplines and are brought together clearly and comprehensively in the Handbook of Research on Student Engagement The Handbook guides readers through the field's rich history sorts out its component constructs and identifies knowledge gaps to be filled by future research Grounding data in real world learning situations contributors analyze indicators and facilitators of student engagement link engagement to motivation and gauge the impact of family peers and teachers on engagement in elementary and secondary grades Findings on the effectiveness of classroom interventions are discussed in detail And because assessing engagement is still a relatively new endeavor chapters on measurement methods and issues round out this important resource Topical areas addressed in the Handbook include Engagement across developmental stages Self efficacy in the engaged learner Parental and social influences on engagement and achievement motivation The engaging nature of teaching for competency development The relationship between engagement and high risk behavior in adolescents Comparing methods for measuring student engagement An essential guide to the expanding knowledge base the Handbook of Research on Student Engagement serves as a valuable resource for researchers scientist practitioners and graduate students in such varied fields as clinical child and school psychology educational psychology public health teaching and teacher education social work and educational policy
