Reducing Global Inequities:

Reducing Global Inequities William Howard Wriggins, Gunnar Adler-Karlsson, 1978 SCOTT copy 1 from the John Holmes Library collection *Reducing Global Inequities* William Howard Wriggins, Gunnar Adler-Karlsson, 1978 SCOTT copy 1 from the John Holmes Library collection *Reducing Global Poverty* Barry B. Hughes, Mohammad T. Irfan, Haider Khan, Krishna B. Kumar, Dale S. Rothman, Jose Roberto Solorzano, 2015-12-22 This is the first volume in an ambitious new series Patterns of Potential Human Progress inspired by the UN Millennium Development Goals MGDs and other initiatives to improve the global condition The first and most fundamental of these goals reducing poverty worldwide is the focus of this book Using the large scale computer program called International Futures IFs developed over three decades at the prestigious University of Denver Graduate School of International Studies this book explores the most extensive set of forecasts of global poverty ever made providing a wide range of scenarios based on an authoritative array of data It transcends the 1 a day baseline measure of poverty and probes important concepts like income poverty gaps and relative poverty The forecasts are long term looking 50 years into the future far beyond the 2015 date set out by the MDGs They are geographically rich spanning the entire globe and drilling down to the country level including one of the most important global focal points India The poverty forecasts in this book and all the volumes in the series are fully integrated in perspective across a wide range of human development arenas including demographics economics politics agriculture energy and the environment Full of colorful thoughtfully designed graphs tables maps and other visual presentations of data and forecasts this large format inaugural volume ensures that the Patterns of Potential Human Progress series will become an indispensable resource for every development professional student professor library and indeed country around the world

Global Inequality Matters D. Moellendorf, 2009-11-04 The globalization of trade investment and finance continues apace Many have benefited from this but deep inequalities persist This book argues that the interconnections established by globalization make possible a critique of its inequality For those who take seriously human dignity equality is a basic presumption of social institutions **The Landscape of Global Health Inequity** Barbara W. K. Son, 2024-07-10 This book presents a unique overview of significant disparities in health which exist within complex and multifaceted contexts across different regions In the twenty first century global health inequity presents substantial health challenges encompassing diverse and interconnected ramifications across socioeconomic cultural and political dimensions Additionally it thoroughly explores the interconnected and multifaceted underlying factors that are widespread in developing nations The book puts forth essential and comprehensive recommendations that call for collaborative efforts at multiple levels including global national and local to identify and address issues effectively *Transitioning to Reduced Inequalities* Sabin Bieri, Christoph Bader, 2023-02-09 The world has never been richer than today The distribution of our global wealth however is hugely biased Since 1980 the gains were mainly captured by the rich The top 1% obtained twice as much of the income growth as

compared to the bottom 50% Nevertheless within economics debates about inequality have remained rather marginal despite long term research by renowned scholars such as Tony Atkinson Within the public arena concerns about inequality emerged as a result of a number of developments First the global financial crisis in 2008 exposed the risks of the financing of the economy secondly 2013 Thomas Picketty's book *Capital in the 21st century* demonstrated that against the trend of the overall 20th century capital returns outstrip the gains through economic growth in recent decades thus threatening social coherence and democratic institutions and thirdly the Millennium Campaign presented impressive achievements regarding poverty but stirred doubts whether the most deprived were left even further behind Since 2015 then the stated aim of SDG 10 is to reduce inequality within and among countries There is growing consensus that economic growth is not sufficient to reduce poverty and that our efforts to make it more inclusive so far were insufficient The very first step reduce inequality is to adopt a systemic perspective allowing an integrative analysis covering both ends of the ladder Policies should be universal in principle and pay attention to the needs of disadvantaged and marginalized populations Predicated on comparison inequality reminds us that it's not enough to study lower earners and the poor Instead the term demands that we expand our perspective scrutinizing how economic value is generated accumulated at whose cost and not least how the overall system could be made fairer Transitioning to Reduced Inequalities therefore explores inequality trends worldwide offers a debate on different measures and comparative perspectives highlights key actors who either benefited or suffered from recent economic trends and explores policy options to reduce inequality and thus contribute to SDG 10 The volume considers particularly conceptual frameworks with regards to the inequality debate the relationship between poverty reduction economic growth and inequality measures of inequality overlooked bypassed groups in developing countries analysis on income wealth growth for different groups in the global north discussion about policies to reduce inequality and further research in the realm of inequality Transitioning to Reduced Inequalities is part of MDPI's new Open Access book series Transitioning to Sustainability With this series MDPI pursues environmentally and socially relevant research which contributes to efforts toward a sustainable world

SDG10 - Reduce Inequality Within and Among Countries Umesh Chandra Pandey, Chhabi Kumar, Martin Ayanore, Hany R. Shalaby, 2020-02-20 Defining inequality as the social economic and political challenges of our time this book will examine SDG10 to look ahead at how policy action might engage multiple stakeholders involve diverse sectors and address gaps between policy and implementation to tackle key inequalities within and among countries

Wealth Creation Approach to Reducing Global Poverty Scott Hipsher, 2020-05-19 This book takes a unique approach to the topic of poverty reduction primarily employing an international business framework as opposed to the usual economic or political lens Some of the key ideas explored in the book include poverty is primarily the lack of choices not the lack of material possessions attacking inequality of opportunity might be a more effective means to reduce poverty than attaching inequality of wealth political systems matter but individuals and for profit firms also have a vital and

indispensable role in helping to create the wealth needed to reduce poverty and an effective corporate social responsibility strategy to help reduce poverty may include finding innovative and creative ways to operate profitably in areas of the world where poverty is currently robbing too many people of the opportunity to live their version of the good life Building on such ideas the book advocates for private companies to expand operations into the least developed regions of the world as part of their corporate social responsibility programs and to reframe the debates away from ones focused on exploitation and economic nationalism to one of creating opportunities across political borders Global Inequalities Robert J.

Holton,2014-11-20 What causes global inequality Why should we be concerned about it Is inequality getting worse or are there signs of improvement and progress This critical analysis of the current state of global inequality pushes beyond ideological prejudice and simplistic explanations to address these important questions Offering a distinctive response to the many challenges in the area the text presents a holistic account of inequality by Taking a multidisciplinary approach incorporating perspectives from sociology politics and economics Recognising the influence of historical trends on inequality today And viewing inequality from a global perspective as well as a national one Drawing on major theories of inequality and up to date evidence Robert J Holton guides readers through the complex issues at hand making this text a valuable resource for students of sociology global studies politics and development studies *Economic Inequality - Trends, Traps and Trade-offs* Medani P. Bhandari,Shvindina Hanna,2022-09-01 The book Economic Inequality Trends Traps and Trade offs presents the unexplored issues of economic inequality including case studies of various countries Inequality is a chronic divisive factor of society It is well known that inequalities such as economic social cultural religious geographical etc have been omnipresent in human society Inequalities can be found within each family each community and each nation and thus globally Inequality is a major cause of political economic social instability and creates crisis and conflict within society A major cause of inequality is unequal uneven biased power centric distributions of human economic social political cultural and spiritual human necessities The edited book examines the major parameters of the socio economic issues of inequality and focuses on the key economic issues of inequality namely income and wealth distribution equity equality of outcome and equality of opportunities Economic inequality is measured by wealth income dsiproportions in distribution and consumption patterns in a specific area Mostly inequality is measured using various statistical tools including the Gini Coefficient inequality adjusted human development index 20 20 ratio Palma ratio Hoover index Galt score Coefficient of variation Theil index wage share etc However not all income can be measured by these tools By using case studies this book encourages us to reframe economic development through the lens of growing inequalities and disparities Economic growth per se is disproportional and the efforts of scholars practitioners and policymakers should be directed to empower the marginalized of society in a way that no one should left behind UN Slogan
