Reflecting Truth Japanese Photography In The Nineteenth Century:

Reflecting Truth Nicole Coolidge Rousmaniere, Mikiko Hirayama, 2004 This publication shows how scholarly investigation of Japanese photography in recent years has entered an important transitional stage moving beyond its focus on new discoveries and descriptions of collections to a more sophisticated investigation of photography in its historical and cultural contexts At one time marginalized as either a practical technique or amateur art form Japanese photography has now earned full recognition as a legitimate subject of scholarly inquiry It is now being examined in terms of its aesthetics technological development and its role in the development of a national identity in Japanese art during the country's transition to modernity as well as in contemporary society Contributors include Himeno Junichi on the early development of photography in Japan Sebastian Dobson focussing on the colourful figure of Felice Beato Luke Gartlan on Baron Raimond von Stillfried Ratenicz Allen Hockley on photographic albums produced by commercial studios in the 1880s and 1890s Kinoshita Naoyuki exploring the tradition of war portraiture in Japan Mikiko Hirayama describing the transition from the pioneering stages of photography in Japan to the modern era Capturing Japan in Nineteenth-century New England Photography Collections Eleanor M. encyclopedia of world photography up to the beginning of the twentieth century It sets out to be the standard definitive reference work on the subject for years to come Its coverage is global an important first in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication The Encyclopedia presents new and ground breaking research alongside accounts of the major established figures in the nineteenth century arena Coverage includes all the key people processes equipment movements styles debates and groupings which helped photography develop from being a solution in search of a problem when first invented to the essential communication tool creative medium and recorder of everyday life which it had become by the dawn of the twentieth century The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth Century Photography an essential reference source for academics students researchers and libraries worldwide *The Visual Culture of Meiji Japan* Ayelet Zohar, Alison J. Miller, 2021-11-29 This volume examines the visual culture of Japan's transition to modernity from 1868 to the first decades of the twentieth century Through this important moment in Japanese history contributors reflect on Japan's transcultural artistic imagination vis a vis the discernment negotiation assimilation and assemblage of diverse aesthetic concepts and visual pursuits The collected chapters show how new cultural notions were partially modified and integrated to become the artistic methods of modern Japan based on the hybridization of major ideologies visualities technologies productions formulations and modes of representation The book presents case studies of creative transformation demonstrating how new concepts and methods were perceived and altered to match views and theories prevalent in Meiji Japan and by what means different practitioners negotiated between their existing skills and the knowledge generated from incoming ideas to create innovative modes of practice and representation that reflected the specificity of modern Japanese artistic circumstances The book will be of interest to scholars working in art history Japanese studies Asian studies and Japanese history as well as those who use approaches and methods related to globalization cross cultural studies transcultural exchange and interdisciplinary studies **Japanese Art - Transcultural Perspectives**

Melanie Trede, Christine Guth, Mio Wakita, 2024-12-02 The transcultural approach to Japanese art history embraced by the contributors to this volume centers on the dynamic aesthetic artistic and conceptual negotiations across cultural temporal and spatial boundaries It not only acknowledges material objects people and technologies as agents but also intangible practices such as knowledge and concepts as vital agencies of interaction in transcultural processes With its premise on connectivity trans territoriality networks and their transformative potential this research destabilizes categorical configurations such as center vs periphery and high vs low calling into question the classical canon of Japanese art history

Felice Beato Anne Lacoste, Felice Beato, 2010 The fascinating life and work of an artist who captured some of the first photographs of the Far East are presented in this gorgeous volume *Visual Counterculture in Japan* Marco

Bohr, 2025-01-23 This book presents innovative analysis of emergent visual trends in Japan from the late 1960s to the present

day Adopting a thematic approach this interdisciplinary text deconstructs the role that visual practices played in shaping a variety of countercultural discourses related to politics gender identity sexuality censorship ethics and disasters The book makes the case that visual practices do not merely function as a way to record counterculture but that such practices are in themselves contributing to dynamics of resistance By considering a wide range of artists photographers film makers and practitioners the book focuses on the way that visual culture transgresses subverts or in the very least questions assumed socio cultural boundaries in Japan In doing so the book foregrounds the crucial role that images play in our society today Images are no just depictions of political shifts as and when they do occur but they form part of this very shift in their own right The book also highlights the interconnectedness between various visual practices and how they fit into wider geopolitical considerations on a global scale

Photography for Everyone Kerry Ross, 2015-06-24 The Japanese passion for photography is almost a cliché but how did it begin Although Japanese art photography has been widely studied this book is the first to demonstrate how photography became an everyday activity Japan's enthusiasm for photography emerged alongside a retail and consumer revolution that marketed products and activities that fit into a modern tasteful middle class lifestyle Kerry Ross examines the magazines and merchandise promoted to ordinary Japanese people in the early twentieth century that allowed Japanese consumers to participate in that lifestyle and gave them a powerful tool to define its contours Each chapter discusses a different facet of this phenomenon from the revolution in retail camera shops to the blizzard of socially constructive how to manuals and to the vocabulary of popular aesthetics that developed from enthusiasts sharing photos Ross looks at the quotidian activities that went into the entire picture making process activities not typically understood as photographic in nature such as shopping for a camera reading photography magazines and even preserving one's pictures in albums These very activities promoted and sponsored by the industry embedded the camera in everyday life as both a consumer object and a technology for understanding modernity making it the irresistible enterprise that Eastman encountered in his first visit to Japan in 1920 when he remarked that the Japanese people were almost as addicted to the Kodak habit as ourselves

Unburied Memories: The Politics of Bodies of Sacred Defense Martyrs in Iran Pedram Khosronejad, 2013-09-13 Today almost a generation has passed since the Iran Iraq war and the memory of it is set to diminish with each passing generation The following questions emerge Can we say that the gradual disappearance of war's memory means that increasingly Iranians will see the Iran Iraq war solely as an historical event How can we defend or reject this idea Today with which elements and values should we look at the Iran Iraq war memorials and ceremonies To what extent will war museums and materials culture be influenced by these new values In the period during and immediately after the Iran Iraq war 1980-88 national bereavement and commemoration of martyrs was neither apparent in common state policy nor a social need Even at the turn of the 21st century anyone walking through Iranian cities many of which had been the main scene of the bloody massacre and direct targets of the Iraqi Republican Guard will have found traces of the terrible almost

unimaginable human losses However today s Iranians can see modern war memorials and monuments in many parts of the urban and rural landscape Yet at the same time the changing landscape has separated Iranians from such remnants of the violence It can be argued that many people in their wish to look forward to a more hopeful future do not wish to be reminded of this period in Iranian history This book was originally published as a special issue of Visual Anthropology
