Reflection W O Mirror:

Mirrors and Reflections Alexandre V. Borovik, Anna Borovik, 2009-11-07 *Mirrors and Reflections* presents a systematic and elementary introduction to the properties of finite groups generated by reflections. The approach is based on fundamental geometric considerations in Coxeter complexes and emphasizes the intuitive geometric aspects of the theory of reflection groups. The exposition is directed at advanced undergraduates and first year graduate students and features a large number of exercises at various levels of difficulty. [NASA Technical Translation](#), 1967

Mirrors and Mirroring from Antiquity to the Early Modern Period Maria Gerolemou, Lilia Diamantopoulou, 2020-01-09 This volume examines mirrors and mirroring through a series of multidisciplinary essays especially focusing on the intersection between technological and cultural dynamics of mirrors. The international scholars brought together here explore critical questions around the mirror as artefact and the phenomenon of mirroring. Beside the common visual registration of an action or inaction in a two dimensional and reversed form various types of mirrors often possess special abilities which can produce a distorted picture of reality serving in this way illusion and falsehood. Part I looks at a selection of theory from ancient writers demonstrating the concern to explore these same questions in antiquity. Part II considers the role reflections can play in forming ideas of gender and identity. Beyond the everyday we see in Part III how oracular mirrors and magical mirrors reveal the invisible divine prosthetics that allow us to look where the eye cannot reach. Finally Part IV considers mirrors roles in displaying the visible and invisible in antiquity and since.
