Reflections On The Economic Transition:

Singapore's Economic Development: Retrospection And Reflections Linda Y C Lim, 2015-12-30 Singapore is known internationally for its successful economic development. Key to its economic successes is a variety of policies put into place over the past 50 years since its independence. Singapore's Economic Development Retrospection and Reflections provides a retrospective analysis of independent Singapore's economic development from the perspective of different policy domains, each considered by different expert scholars in that particular field. The book is written by academic economists in a style that is accessible to non-experts. Each chapter includes reviews of past scholarship, current data on each policy area, and reflections on required or desirable future policy changes and outcomes. By examining the evolution of past and current policies which combined to make Singapore's development a success and exploring emerging developmental challenges, Singapore's Economic Development Retrospection and Reflections gives readers a better understanding of Singapore's economic trajectory and future.

Thoughts on Economic Development in China Ma Ying, Hans-Michael Trautwein, 2013-03-05 This book is about mutual influences of thinking about economic development in China and in the West from the 18th century until the present. Its chapters are contributed by development economists and historians of thought from China and other parts of the world. The book describes important stages in the evolution, cross-fertilization, and contextual modification of ideas about economic order, development, and institutional change. It illustrates how Western concepts and theories have been adopted and adapted to Chinese conditions in different waves of modernization from the late 19th century until the present, and that this was and is no one-way traffic. The book examines to what extent pre-classical thinking in the West, in particular French Physiocracy in the mid-18th century, was influenced by China as an ideal and a source of ideas at a time when China was the largest and most advanced economy in the world. It discusses to what extent different approaches of modern Western-style economics, in particular in the fields of development economics and institutional economics, can be used to understand the rapid transitions and developments of the Chinese economy in recent decades and to what extent they need to be modified in the light of new experiences and insights. Against this background, several contributions to the volume provide assessments of the current state of economic science and teaching in China, in particular with regard to Chinese views on Western economics. The book should be of interest to those who are interested in the economic history of China.

Perspectives: A Holistic Reflection T A Ngwana, 2024-01-05 Africa remains a continent that is yet to achieve its full potentials despite an abundance of resources and a rich cultural pedigree There have been various attempts to dissect the impediments to the continent's progress in its march towards development and true independence Consequently this book moves away from mere identification of challenges to proffering solutions The ideas put forward about African development in this book draw from a multiplicity of backgrounds They are also offered through the prism of the lived experiences of contributors who are keen on engendering an African solution that weaves global dynamics into Africa's cultural context and did not shy away from identifying themselves as global citizens from Africa The compelling read is a critical appraisal of germane issues in Africa's quest for development which speaks truth to both the powerful and the powerless within and beyond Africa on why prioritising Africa's development is as pressing as the Global climate catastrophe
