Hasko, Renee Perelmutter, 2010 This volume unifies a wide breadth of interdisciplinary studies examining the expression of motion in Slavic languages The contributors to the volume have joined in the discussion of Slavic motion talk from diachronic typological comparative cognitive and acquisitional perspectives with a particular focus on verbs of motion the nuclei of the lexicalization patterns for encoding motion Motion verbs are notorious among Slavic linguists for their baffling idiosyncratic behavior in their lexical semantic syntactical and aspectual characteristics The collaborative effort of this volume is aimed both at highlighting and accounting for the unique properties of Slavic verbs of motion and at situating Slavic languages within the larger framework of typological research investigating cross linguistic encoding of the motion domain Due to the multiplicity of approaches to the linguistic analysis the collection offers it will suitably complement courses and programs of study focusing on Slavic linguistics as well as typology diachronic and comparative linguistics semantics and second language acquisition This important book is a model of in depth exploration that is much needed intra typological diachronic and synchronic exploration of contrasting ways of encoding a particular semantic domain in this case the domain of motion events The various Slavic languages present contrasting but related solutions to the intersection of motion and aspect And as a group they offer alternate forms of satellite framed typology in contrast to the more heavily studied Germanic languages of this general type The up to date and interdisciplinary nature of the volume makes it essential reading in cognitive and typological linguistics Dan I Slobin Professor Emeritus of Psychology and Linguistics University of California Berkeley A feast for the mind with untold riches and variety different approaches patterns and usage diachronic as well as synchronic Slavic and not just Russian All on a high intellectual level from capable scholars Ful besy were the editors in every thing That to the feste was appertinent Alan Timberlake Columbia University Slavic Review ,1997 **The British National**

Bibliography Arthur James Wells, 1996 *Directions for Pedagogical Construction Grammar* Hans C. Boas, 2022-02-21 How can insights from Construction Grammar CxG be applied to foreign language learning FLL and foreign language teaching FLT This volume explores several aspects of Pedagogical Construction Grammar with a specific look at issues relevant to second language acquisition FLL and FLT The contributions in this volume discuss a wide range of constructions as well as different resources methodologies and data used to learn constructions in the language classroom More specifically they seek to provide answers to the following questions What do new constructional approaches to teaching and learning foreign language look like that take the insights of CxG seriously What should electronic resources using constructions and semantic

frames for foreign language instruction look like How should constructions pairings of form with meaning function in the foreign language classroom be introduced What role does frequency play in learning constructions in the language classroom What types of strategies does CxG offer to facilitate the acquisition of a second language This volume is relevant for anyone interested in second language acquisition foreign language pedagogy Construction Grammar and Cognitive Linguistics Endorsements If first language learning flows forth from language use teaching language should be based on relevant usage patterns modified in accordance with the advanced cognitive and linguistic knowledge of older learners The current volume shows how insights from first and second language learning and usage based Construction Grammar can be turned into evidence based teaching strategies Heike Behrens University of Basel Usage based Construction Grammar has changed our view of language learning but it is only recently that researchers have begun to apply the insights of the constructionist approach to language pedagogy This volume brings together a collection of articles in which experts of Construction Grammar and Usage based Linguistics make concrete proposals for teaching constructions by using corpora and other resources A must read for everybody interested in grammar teaching Holger Diessel University of Jena With Directions for Pedagogical Construction Grammar Boas has produced an impressive and much needed volume which excels at illustrating the immense potential of constructionist approaches to improve language pedagogy The contributions to this volume all authored by leading cognitive and corpus linguists convincingly describe what a successful future of language teaching could look like one that is founded in usage based linguistics and takes language patterns seriously I consider this volume essential reading for any applied linguist Ute R mer Georgia State University *The Bilingual Mind* Aneta Pavlenko, 2014-02-06 If languages influence the way we think do bilinguals think differently in their respective languages And if languages do not affect thought why do bilinguals often perceive such influence For many years these questions remained unanswered because the research on language and thought had focused solely on the monolingual mind Bilinguals were either excluded from this research as unusual or messy subjects or treated as representative speakers of their first languages Only recently did bi and multilinguals become research participants in their own right Pavlenko considers the socio political circumstances that led to the monolingual status quo and shows how the invisibility of bilingual participants compromised the validity and reliability of findings in the study of language and cognition She then shifts attention to the bilingual turn in the field and examines its contributions to the understanding of the human mind **Linguistic Simplicity and Complexity** John H. McWhorter, 2011 This series offers a wide forum for work on contact linguistics using an integrated approach to both diachronic and synchronic manifestations of contact ranging from social and individual aspects to structural typological issues Topics covered by the series include child and adult bilingualism and multilingualism contact languages borrowing and contact induced typological change code switching in conversation societal multilingualism bilingual language processing and various other topics related to language contact The series does not have a fixed theoretical orientation and includes
