Springer Handbook of Systematic Musicology Rolf Bader, 2018-03-21. This unique reference book offers a holistic description of the multifaceted field of systematic musicology, which is the study of music, its production and perception, and its cultural, historical, and philosophical background. The seven sections reflect the main topics in this interdisciplinary subject. The first two parts discuss musical acoustics and signal processing, comprehensively describing the mathematical and physical fundamentals of musical sound generation and propagation. The complex interplay of physiology and psychology involved in sound and music perception is covered in the following sections, with a particular focus on psychoacoustics and the recently evolved research on embodied music cognition. In addition, a huge variety of technical applications for professional training, music composition, and consumer electronics are presented. A section on music ethnology completes this comprehensive handbook. Music theory and philosophy of music are imbedded throughout. Carefully edited and written by internationally respected experts, it is an invaluable reference resource for professionals and graduate students alike.

RoCKIn: Benchmarking Through Robot Competitions Multiple Authors, 2017-08-09. The book *RoCKIn: Benchmarking Through Robot Competitions* describes the activities and achievements on the promotion of Robotics research and benchmarking in Europe through robot competitions carried out within the framework of the RoCKIn Robot Competitions. Kick Innovation in Cognitive Systems and Robotics Coordination Action, a project funded by the European Commission EC 7th Framework Programme FP7. RoCKIn was one of the two pioneer projects on robot competitions in Europe funded by the EC, representing the acknowledgment of robot competitions as important tools to advance research on Robotics, besides education and public awareness of Robotics. Two challenges were selected for the RoCKIn competitions due to their high relevance and impact on Europe's societal and industrial needs: domestic service robots (RoCKIn Home) and innovative robot applications in industry (RoCKIn Work). Along the book chapters, the reader will find details on RoCKIn Home and RoCKIn Work and about the activities carried out during the project lifetime, namely the developed open domain test beds for competitions targeting the two challenges and usable by researchers worldwide, the scoring and benchmarking methods to assess the performance of robot systems and subsystems, and the building up of a community of new teams. The book ends with an assessment by the project industrial partner about the impact of RoCKIn and other robot competitions on the industrial robot markets. The project work was funded by the
