Sg Sociology In A Changing World:

The Making of Singapore Sociology Tong Chee-Kiong, Lian Kwen-Fee, 2021-11-08 This book presents a collection of essays of how the city state of Singapore's societal dynamics have evolved from the time of its birth as a nation in 1965 to the present. Key areas of Singapore society are explored contributing to the understanding of the social organisation of the city. This study reveals a shift from the modernisation studies in the 1970s to a more political economic turn as a consequence of the influence of dependency and world systems theories. Topics covered include urban studies, family, education, medical care, class and social stratification, work, language, ethnic groups, religion, and crime and deviance. **Sociologies in Dialogue**

Sari Hanafi, Chin-Chun Yi, 2020-07-21 Sociologies in Dialogue brings together expert contributions from international scholars who reflect on the importance of collaboration between diverse sociological perspectives to enhance our understanding of the role of sociology as an academic discipline and as a vehicle for social change. By exploring the distinctive practices and research of a range of sociologists, the book shows how an open dialogue between sociologists is critical to addressing major sociological issues across the globe such as inequality and ethnocentrism and challenging the hierarchies of knowledge production and circulation. Contributors also discuss novel strands in theory and methodology such as multicultural sociology, cosmopolitanism and multiple modernities. An important contribution for researchers and students interested in global sociology, sociological theories and methodologies. **The Contemporary Family in Singapore** Eddie C. Y. Kuo, Aline K. Wong, 1979 Twelve essays on the sociology of the family in Singapore in the modern period. **Globalization and the**

Evolving World Society, 2021-11-01 The societies of the present world are experiencing many turbulent changes. New forces of change and modernization are driving people, business and cultures across borders. The world has become a home to a new generation of homo sapiens who are curious about others but at the same time cherish to preserve their own cultures. What is the nature of this evolving world society? Is the world driving toward a new global civilization, an end of history or an inevitable civilizational clash? The present volume has brought together leading scholars in the field to examine the concept of globalization, deliberate on the character of its multifaceted nature and expressions and delineate its impact on the emerging world economy, politics, culture and science. A number of substantive issues such as the emergence of new global economic inequality, culture and the role of the trans-nationals, nature of the emerging global environmental regimes, rise of the NICs and the conflicting role of the nation-states in the face of the advancing forces of globalization are addressed. It is contended that globalization should be perceived neither as an unbounded economic progress nor as an expansion of western domination. Globalization is rather defined as a new development strategy, a process of change that can be planned, guided and controlled. For national political and business leaders of the world, the volume provides a blueprint of the emerging areas of policy concerns and guidance. For the world of social science, it presents a road map of the emerging intellectual issues and challenges. Contributors are Alessandro Bonanno, Stephen W. K. Chiu, Douglas Constance, Richard J. Estes, R. Scott Frey.

Derluguian, Scott L. Greer, 2000-08-30 This volume takes an enlightened step back from the ongoing discussion of globalization The authors reject the notion that globalization is an analytically useful term Rather this volume shows globalization as merely the framework of the current political debate on the future of world power Some of the many other novel ideas advanced by the authors include the explicit prediction that East Asia is not going to become the center of the world the contention that the USSR collapsed for the same reasons that nearly brought down the United States in 1973 and the notion that the regional economic networks that are emerging from under the modern states are in fact rather old formations The articles in the volume are organized around three main themes Part One explores both the changing patterns of global power from the viewpoint of geopolitics and the Gramscian approach to the study of international relations Part Two further develops the debate among a number of eminent historians and sociologists challenging both the apologists for and the opponents of globalization in new and unexpected ways Part Three traces the emergence of regional economic networks and explores the ambiguous problems of security and identity posed by the old new transborder formations **The**

Encyclopedia of Diversity in Education James A. Banks, 2012-05-17 The diversity education literature both nationally and internationally is broad and diffuse. Consequently, there needs to be a systematic and logical way to organize and present the state of research for students and professionals. American citizens need to understand the dynamics of their increasingly diverse communities and institutions and the global world in which we live, work, and lead. With continually evolving information on diversity policies, practices, and programs, it is important to have one place where students, scholars, teachers, and policymakers can examine and explore research, policy, and practice issues and find answers to important questions about how diversity in U.S. education is enriched with theories, research, and practices in other nations, are explained and communicated, and how they affect institutional change at both the K-12 and postsecondary levels. With about 700 signed entries with cross references and recommended readings, the *Encyclopedia of Diversity in Education* (4 volumes in both print and electronic formats) will present research and statistics, case studies, and best practices, policies, and programs at pre and postsecondary levels. Diversity is a worldwide phenomenon, and while most of the entries in the *Encyclopedia* will focus on the United States, diversity issues and developments in nations around the world, including the United States, are intricately connected. Consequently, to illuminate the many aspects of diversity, this volume will contain entries from different nations in the world in order to illuminate the myriad aspects of diversity. From A to Z, this *Encyclopedia* will cover the full spectrum of diversity issues, including race, class, gender, religion, language, exceptionality, and the global dimensions of diversity as they relate to education. This four-volume reference work will be the definitive reference for diversity issues in education in the United States and the world.
