Cognitive and Instructional Processes in History and the Social Sciences Mario Carretero, James F. Voss, 2012-12-06 This volume is a direct result of an international conference that brought together a number of scholars from Europe and the United States to discuss their ideas and research about cognitive and instructional processes in history and the social sciences. As such it fills a major gap in the study of how people learn and reason in the context of particular subject matter domains and how instruction can be improved in order to facilitate better learning and reasoning. Previous cognitive work on subject matter learning has been focused primarily upon mathematics and physics; the present effort provides the first such venture examining the history and social science domains from a cognitive perspective. The different sections of the book cover topics related to comprehension learning and instruction of history and the social sciences including the development of some social sciences concepts, the teaching of social sciences problems and questions arising from this cognitive perspective of learning, the comprehension and learning from historical texts, how people and students understand historical causality and provide explanations of historical events and the deduction processes involved in reasoning about social sciences contents. This volume will be useful for primary and secondary school teachers and for cognitive and instructional researchers interested in problem solving and reasoning, text comprehension, domain specific knowledge acquisition and concept development.

Handbook of Research on Supporting Social and Emotional Development Through Literacy Education Tussey, Jill, Haas, Leslie, 2021-06-25 The social and emotional welfare of students in both K-12 and higher education settings has become increasingly important during the third decade of the 21st century as students face a variety of social emotional learning (SEL) challenges related to a multitude of internal and external factors. As concepts around traditional literacy education evolve and become more culturally and linguistically relevant, the connections between SEL and academic literacy opportunities warrant considerable exploration. The Handbook of Research on Supporting Social and Emotional Development Through Literacy Education develops a conceptual framework around pedagogical connections to social and emotional teaching and learning within K-12 literacy practices. This text provides a variety of research and practice protocols supporting student success through the integration of SEL and literacy across grade levels. Covering topics such as culturally relevant literacy, digital literacy and content area literacy, this handbook is essential for curriculum directors, education faculty, instructional facilitators, literacy professionals, practicing teachers, pre-service teachers, professional development coordinators, school counselors, teacher preparation programs, academicians, researchers and students.
