Totally Implantable Venous Access Devices Isidoro Di Carlo,Roberto Biffi,2012-02-01 Since their first application in 1982 Totally Implantable Venous Access Devices TIVADs have become increasingly important in the clinical practice as more intensive chemotherapy and parenteral treatments have come into use At this time there is objective evidence that TIVADs are a safe effective strategy for long term venous access they play a significant role throughout the management of the oncology patient as they are needed in the initial phases for active treatments as well as in the last stages for palliative measures making possible repeated administration of chemotherapeutic vesicant agents nutrients antibiotics analgesics and blood products According to a number of prospective studies use of TIVADs is associated with a significant complication rate 10% to 25% of all patients Evidence based data support that most complications are directly related to inappropriate technique of placement and or nursing care sometimes leading to TIVAD loss significant morbidity increased duration of hospitalization and additional medical cost A group of world renowned experts both in the clinical and research fields contributed to this volume whose aim is to provide clinicians nurses and medical students with a multidisciplinary full update on these devices as long term central venous access can no be longer considered a routine matter and serious complications can be maintained at a very low level only if strict adherence to a well defined protocol of surgical technique and of catheter care is maintained Artificial Nutrition and Support in Clinical Practice Jason Payne-James,George K. Grimble,David B. A. Silk,2012-08-09 Any healthcare professional with or developing an interest in clinical nutrition will be able to use this textbook first published in 2001 as a source of information for the formation of a clinical nutrition support service of excellence The first three parts of the book will enable a clear perspective of the metabolism and physiology of clinical nutrition to be related to the practical application of support techniques The fourth part of the book highlights the role of nutrition support in specific disease groups A number of additional chapters have been added for this second edition and modifications made to the content of chapters from the first edition to cover newer areas or areas of omission

Catheter-Related Infections Harald Seifert,Bernd Jansen,Barry Farr,2004-10-27 This updated reference describes the latest and most effective strategies in the diagnosis management and treatment of catheter related infections CRIs The guide describes the pathogenesis of infectious complications while discussing procedures in infection control catheter and catheter site care and patient monitoring and evaluation This n **Radiology of the Chest and Related Conditions** F W Wright,2022-04-18 The book presents a comprehensive overview of the various disease processes affecting the chest and

related abnormalities It discusses biopsy and bronchography as well as a variety of imaging techniques including radiography fluoroscopy tomography and ultrasound

Vascular and Peritoneal Access for Dialysis V.E. Andreucci,2012-12-06 When the external Quinton Scribner arteriovenous shunt was developed in 1960 and a little later the internal Brescia Cimino arteriovenous fistula was developed as a vascular access for hemodialysis thereby making possible regular dialysis therapy of chronic uremic patients many nephrologists became surgeons having learned the type of vascular surgery related to hemodialysis quite well The same series of events occurred with regards to peritoneal dialysis with the introduction of the Tenckhoff catheter and the need for gaining a permanent access to the peritoneum for chronic ambulatory peritoneal dialysis CAPD therapy With time however problems relating to vascular and peritoneal access have forced many nephrologists to give up their surgery meanwhile many surgeons have become quite expert in some sophisticated techniques relating to dialysis e g vessel grafting prosthesis implantation etc Today whether or not involved in this type of surgery both nephrologists and surgeons remain interested in knowing all available access devices for dialysis as well as the surgical techniques involved However all nephrologists involved in dialysis must know how to prevent or treat complications related to dialysis access Thus it appeared to me to be quite advisable to have a book in my series Topics in Renal Medicine dealing with vascular and peritoneal access for dialysis

Management of Acute Kidney Problems Achim Jörres,Claudio Ronco,John A.

Kellum,2010-03-11 Acute kidney failure is an important clinical area in the intensive care unit setting An estimated 5 20% of critically ill patients experience an episode of acute kidney failure during the course of their illness and about 5% of patients admitted to an ICU will eventually require renal replacement therapy In these patients in hospital mortality is extremely high exceeding 50% Thus the early detection and causal treatment of acute kidney problems is vitally important for a successful outcome Written by internationally renowned experts this clinical reference offers helpful advice with the most recent information on the definition epidemiology pathophysiology and clinical causes of acute kidney failure as a fundamental prerequisite for prevention of this disorder Moreover it also covers differential diagnostic approaches for patients with acute renal failure and provides a detailed outline of important measures for their clinical management Finally separate chapters are dedicated to various key aspects related to the adequate delivery of acute renal replacement therapy It is intended as a helpful guide for all clinicians involved in the care of patients at risk of developing acute kidney problems
