The PDS - A symbol of eastern German identity? Adrian Webb, 2009-03-26 Die Linke the Left is now Germany s third largest political party and the fourth largest political grouping in the Bundestag Germany s parliament Die Linke however is the result of a fusion in June 2007 between the left wing of the German social democratic party SPD and the Partei des demokratischen Sozialismus PDS the successor to East Germany s former effectively Communist ruling party the SED In practice the PDS contributed 60 000 of the new party s 72 000 members making Die Linke an essentially eastern German party Moreover the PDS had been unique in enjoying a level of electoral success denied to other Communist successor parties which had not turned themselves into mainstream social democratic parties within the new liberal democratic order This book employing the period 2001 03 for its detailed analysis suggests that this uniqueness is best understood as either an expression of eastern German national sentiment or as deriving from a reinterpretation of Marxism attuned to the interests of a democratic twenty first century society and the book explores

these alternative understandings in turn. Noting both the historic distinctiveness of German capitalism and the contradictions within German communism it concludes that the PDS now fused in Die Linke remains nourished by the particularism of eastern Germany. *Longman Companion to Germany since 1945* Adrian Webb, 2014-09-09 This new Companion provides a wealth of information on the history of Germany since the Second World War including much material which is not readily available. Nationalism and Territory George W. White, 2000 Why do nations come into conflict What factors lead to the horrors of ethnic cleansing This timely book offers clear eyed answers to these questions by exploring how national identity is shaped by place focusing especially on Serbia Hungary and Romania Moving beyond studies of nationalism that consider only the economic and geostrategic value of territory George W White shows that the very core of national identity is intimately bound to specific places Indeed nations define themselves in terms of spaces that have historical linguistic and religious meaning as Serbs have clearly demonstrated in Kosovo These territories are concrete expressions of a nation's identity both past and present With his detailed analysis of the places that define national identity in Southeastern Europe White convincingly shows why territorial disputes so often escalate into war

Chamberlain, 2014-06-11 The European empires as they existed from the Age of Discovery until after the First World War shaped the modern world So great has been their political economic and cultural influence that to fully understand contemporary history and events it is essential to have an understanding of the imperial past This book is an impressive achievement It brings together in one comprehensive volume all the essential facts and figures relating to the process of empire building by the European powers It complements the Longman Companion to European Decolonisation in the Twentieth Century by the same author together they help to explain why different empires had different philosophies dissolved in different ways and left different legacies
