Capturing Snowflakes Kenneth Libbrecht, Rachel Wing, 2021-10-05 High above the Earth a snowflake is born Crystalline branches form around a nucleus of microscopic dust creating a one of a kind natural design Because it weighs next to nothing a snow crystal may take hours to fall finally landing where Kenneth Libbrecht's remarkable microphotography can capture the fleeting beauty and complexity of winter's frozen artistry The wonder of snowflakes lies partly in how they are fashioned into such complex and symmetrical shapes with no blueprints or genetic codes to guide their formation The snowflake is a fleeting mysterious work of nature's art that has long fascinated humans The first medieval scientist was so astounded by their remarkable symmetry that he wondered if these ice crystals might have souls Indeed how do they develop into such a never ending and endlessly fascinating variety of intricate lacy patterns Join the world's leading snowflake expert Caltech physicist Kenneth Libbrecht as he delightfully chronicles the creation of the snow crystal both in nature and in the laboratory With this captivating book and keepsake ornament we can better appreciate the snowflake's frozen artistry Book jacket

Modern Physics and Ancient Faith Stephen M. Barr, 2003-02-28 A considerable amount of public debate and media print has been devoted to the war between science and religion In his accessible and eminently readable new book Stephen M Barr demonstrates that what is really at war with religion is not science itself but a philosophy called scientific materialism Modern Physics and Ancient Faith argues that the great discoveries of modern physics are more compatible with the central teachings of Christianity and Judaism about God the cosmos and the human soul than with the atheistic viewpoint of scientific materialism Scientific materialism grew out of scientific discoveries made from the time of Copernicus up to the beginning of the twentieth century These discoveries led many thoughtful people to the conclusion that the universe has no cause or purpose that the human race is an accidental by product of blind material forces and that the ultimate reality is matter itself Barr contends that the revolutionary discoveries of the twentieth century run counter to this line of thought He uses five of these discoveries the Big Bang theory unified field theories anthropic coincidences Godel's Theorem in mathematics and quantum theory to cast serious doubt on the materialist's view of the world and to give greater credence to Judeo-Christian claims about God and the universe Written in clear language Barr's rigorous and fair text explains modern physics to general readers without oversimplification Using the insights of modern physics he reveals that modern scientific discoveries and religious faith are deeply consonant Anyone with an interest in science and religion will find Modern Physics and Ancient Faith invaluable
