Enforcing International Maritime Legislation on Air Pollution through UNCLOS Jesper Jarl Fanø,2019-12-26 This book

explores the scope and applicability of the United Nations Convention on the Law of the Sea UNCLOS relating to the enforcement of international maritime legislation on air pollution. It focuses on enforcement of Annex VI of the International Convention for the Prevention of Pollution from Ships MARPOL Annex VI and the strengthened global sulphur limit which comes into force in 2020. The first chapters in Part I provide an overall introduction to relevant regulations of MARPOL Annex VI UNCLOS Port State Control PSC the EU Sulphur Directive and basic jurisdictional principles of international law. Part II analyses the amplified enforcement and notifying obligations of UNCLOS chapter XII placed on flag States and the broadened jurisdictions for port and coastal States to enforce. This includes extraterritorial enforcement by port States on the high seas and how overlapping jurisdictions are resolved. These theoretical discussions on jurisdiction are tied to practical applications pertaining to PSC and sanctioning. Part III builds upon the conclusions of Part II in relation to the enforcement of other legislation adopted by the International Maritime Organization IMO including regulations on Greenhouse Gases GHG which the IMO is set to adopt through its GHG Strategy. Finally with the increased environmental challenges relating to global warming and given the special legal status of ships Part IV offers an analysis of whether specific IMO regulations on GHG could in the future be considered peremptory norms of a jus cogens character and addresses the potential legal implications.

Japan, the Sustainable Society John Lie, 2021-12-28 By the late twentieth century Japan had gained worldwide attention as an economic powerhouse. Having miraculously risen from the ashes of World War II it was seen by many as a country to be admired if not emulated. But by the early 1990s that bubble burst in spectacular fashion. The Japanese economic miracle was over. In this book John Lie argues that in many ways the Japan of today has the potential to be even more significant than it was four decades ago. As countries face the prospect of a world with decreasing economic growth and increasing environmental dangers Japan offers a unique glimpse into what a viable future might look like: one in which people acknowledge the limits of the economy and environment while championing meaningful and sustainable ways of working and living. Beneath and beyond the rhetoric of growth some Japanese are leading sustainable lives and creating a sustainable society. Though he does not prescribe a one size fits all cure for the world Lie makes the compelling case that contemporary Japanese society offers a possibility for how other nations might begin to valorize everyday life and cultivate ordinary virtues.

The Beautiful Catastrophe of Wind Roger Theodoredis, 2009-03 No one ever chooses to stop at Black Rock Mesa; it's too desolate. The brutal wind ever present and temperamental tests the willpower of the most stalwart residents. So when a mysterious woman impulsively disembarks from a bus and gets blown into the town's general store her presence causes quite a stir. She says little but her Asian features earn her the nickname Tokyo. Deciding to stay in town she reveals little about her past and is comforted to find little is asked. Slowly she comes to see that Black Rock is not like other towns due to the wind.

everything even time works a bit differently Black Rock she learns was founded by three prospectors looking for gold Noah Shlomo and Apie Noah the most charismatic of the three attracted quarrymen to this unforgiving place to tirelessly chip and haul the slate down from the mesa But the big gaps left in the stories of the past hint to Tokyo that the town folk have secrets bigger than her own No one is talking not even the man Tokyo takes up with Luke Noah s son This reticence suits Tokyo just fine until one day a strange man shows up in Black Rock with revelations Ultimately no secret is immune

Einstein revolutionized our view of the Universe His first was that nothing can travel faster than light the ultimate speed limit This simple fact leads to the unavoidable conclusion that space and time must be linked together forever as Spacetime With his second monumental insight Einstein showed how Spacetime is warped and stretched by the gravity of all objects in the Universe and even punctured by black holes But such possible twisting of Spacetime allowed a magic not even Einstein could have imagined time travel Theoretical physicist Jim Al Khalili finally lays science fiction to rest as he opens up Einstein s Universe Leading us gently and light heartedly through the dizzying world of our space and time he even gives us the recipe for a time machine capable of taking us Back to the Future to Alice s Wonderland or on a trip with the Terminator
