Looking Deep:

Looking Deep in the Southern Sky Raffaella Morganti, Warrick J. Couch, 2013-11-11 The idea of a joint ESO Australia meeting on the large number of exciting new facilities that are or will soon be available in the southern hemisphere arose quite naturally. In the optical and the near infrared the Very Large Telescope VLT will soon be operational. In the radio the Australia Telescope Compact Array is going to be upgraded to higher frequencies 20 and 100 GHz together with an improvement in very long baseline interferometry VLBI facilities. Other major facilities such as the Large Millimetre Array and the SKA are being planned. Moreover new deep surveys are underway in the southern hemisphere: the southern Hubble Deep Field, the ESO Imaging Survey, the SDSS, the UK Schmidt telescope and the Anglo-Australian Telescope AAT 2dF galaxy QSO redshift survey in the optical and the Parkes multibeam HI survey and Molonglo Observatory Synthesis Telescope MOST Wide Field continuum survey at radio wavelengths. With all these new facilities important progress will be made regarding important issues such as the large scale structure of the universe, the very early universe and the associated first epoch of galaxy formation. The generation of large databases and the opportunity for sensitive follow up observations in complementary wavebands mean that coordinated radio infrared and optical projects in the southern hemisphere are likely to become increasingly attractive and important.

Change Through Time in Psychoanalysis Margaret Ann Fitzpatrick Hanly, Marina Altmann de Litvan, Ricardo Bernardi, 2021-04-18 Change Through Time in Psychoanalysis presents a new stage of the work done through the IPA Committee on Clinical Observation between 2014 and 2020: the advances in our method, the Three Level Model 3 LM and our clinical thinking. In this new volume ideas on observational research, clinical narratives based on 3 LM group discussions and adaptations of the model for training candidates show more experience, more depth, more answers and of course new questions. Contributors from three regions of the IPA have written extended case studies of 10 psychoanalyses rich in verbatim session material focusing on the main dimensions of the patient's psychic functioning, specific changes in the analytic process and related interventional strategies. The reader will find in the method and in the clinical narratives new and clarifying points of view in the observation of transformations in patients in psychoanalysis and of the analysts' techniques useful both in professional development and in teaching candidates.

Tactics of Conquest Barry N. Malzberg, 2011-09-29 You mean we're truly going to play for the fate of the Universe? Exactly. The Overlord said a forty-one game chess match to be broadcast throughout all civilized sectors of your Universe so that everyone can witness it. But why chess? Why me? Why this planet? Because chess is ideal for such a final judgement: it is a methodical game with absolutely no element of luck and therefore there can be no complaints by the loser. Chess is known only to your planet and you and your opponent are the most evenly matched living players. Good against evil. No other chess players are so close in true potential abilities. There is no other reason.
