Boost your students 21st century skills How do we know if we are sufficiently preparing the students of today for the challenges of the 21st century To answer this question John Barell explains how inquiry leads to problem solving and provides specific steps for pre formative and summative assessment that informs instruction of 21st century skills Included are examples that show how to use today s technology in the classroom and how to use inquiry to develop and assess students ability to Think critically and creatively Collaborate with others Become self directed learners Adapt and become resourceful Develop a sense of leadership responsibility and global awareness      Missing Links John Reader,2011-10-27

This is the story of the search for human origins from the Middle Ages when questions of the earth s antiquity first began to arise through to the latest genetic discoveries that show the interrelatedness of all living creatures Central to the story is the part played by fossils first in establishing the age of the Earth then following Darwin in the pursuit of possible Missing Links that would establish whether or not humans and chimpanzees share a common ancestor John Reader s passion for this quest palaeoanthropology began in the 1960s when he reported for Life Magazine on Richard Leakey s first fossil hunting expedition to the badlands of East Turkana in Kenya Drawing on both historic and recent research he tells the fascinating story of the science as it has developed from the activities of a few dedicated individuals into the rigorous multidisciplinary work of today His arresting photographs give a unique insight into the fossils the discoverers and the settings His vivid narrative reveals both the context in which our ancestors evolved and also the realities confronting the modern scientist The story he tells is peopled by eccentrics and enthusiasts and punctuated by controversy and even fraud It is a celebration of discoveries Neanderthal Man in the 1850s Java Man 1891 Australopithecus 1925 Peking Man 1926 Homo habilis 1964 Lucy 1978 Floresiensis 2004 and Ardipithecus 2009 It is a story of fragmentary shards of evidence and the competing interpretations built upon them And it is a tale of scientific breakthroughs dating technology genetics and molecular biology that have enabled us to set the fossil evidence in the context of human evolution John Reader s first book on this subject Missing Links The Hunt for Earliest Man 1981 was described in Nature as the best popular account of palaeoanthropology I have ever read His new book covers the thirty years of discovery that have followed      **Critical Thinking Across the**
