Special Report ,1992 *Landmark Briefs and Arguments of the Supreme Court of the United States* United States. Supreme Court,2004 *Drawing Deportation* Silvia Rodriguez Vega,2023-02-14 Illustrates how the children of immigrants use art to grapple with issues of citizenship state violence and belonging Young immigrant children often do not have the words to express how their lives are shaped by issues of immigration legal status and state sanctioned violence Yet they are able to communicate its effects on them using art Based on ten years of work with immigrant children as young as six years old in Arizona and California and featuring an analysis of three hundred drawings theater performances and family interviews Silvia Rodriguez Vega provides accounts of children s challenges with deportation and family separation during the Obama and Trump administrations While much of the literature on immigrant children depicts them as passive when viewed through this lens they appear as agents of their own stories The volume provides key insights into how immigrant children in both states presented creative out of the box powerful solutions to the dilemmas that anti immigrant rhetoric and harsh immigration laws present Through art they demonstrated a righteous indignation against societal violence dehumanization and death as a tool for navigating a racist anti immigrant society When children are the agents of their own stories they can reimagine destructive situations in ways that adults sometimes cannot offering us alternatives and hope for a better future At once devastating and revelatory *Drawing Deportation* provides a roadmap for how art can provide a safe and necessary space for vulnerable populations to assert their humanity in a world that would rather divest them of it

Latino Politics in America John A. García, 2011-09-29 Latinos constitute the fastest growing population in the United States today and Latino political participation is growing rapidly Still Latino political power is not commensurate with the numbers and much potential remains to be tapped In *Latino Politics in America* author John A. García examines the development of this vibrant community and points the way toward a future of shared interests and coalitions among the diverse Latino subgroups This newly revised edition lays out the basic facts of Latino America who Latinos are where they come from where they reside and then connects these facts to political realities of immigration citizenship voting education organization and leadership García's nuanced portrait of contemporary Latino political life first published in 2003 has been updated throughout to include data from the 2010 census and the 2008 and 2010 elections Journal of the National Cancer Institute, 1990 Ritual, Identity, and the Mayan Diaspora Nancy J. Wellmeier, 1998 This book analyzes the lives and the continuing ritual traditions of the Mayas who live in the United States Focusing on a predominantly Maya town in rural Florida it shows how members of this ancient Central American civilization use their religious tradition to maintain their ethnic identity in an unfamiliar environment Bringing together studies of Mesoamerican fiesta or cargo systems religious ritual and migration studies this interdisciplinary work describes the religious traditions of indigenous Guatemala the crisis migration of the 1980s and the Mayas daily life in the United States including Maya women's reflections on their new challenges The book is unique in its focus on the transfer of the fiesta cycle to the diaspora and its analysis of the behind the scenes aspects of ritual The rise of leadership contested interpretations of ethnic identity choices about symbolic representation and maintenance of ties to villages of origin all take place in the context of organizing public ritual events Through these strategies the Maya people not only cope materially and spiritually with the chaotic experience of uprootedness but find ways to strengthen their unique identity Bibliography Index *Global Migrants, Global Refugees* Aristide R. Zolberg, Peter M. Benda, 2001-06-01 In recent years several influential commentators have stated or strongly implied that the advanced industrial democracies are today being overwhelmed by a host of problems including rapid population growth the breakup of multi ethnic states environmental degradation and increasing economic differentials between the developing and developed worlds for which no effective solutions are at hand The migration inducing potential of these post Cold War developments has been a particular source of concern This volume provides a counter catastrophic

view of developments and a more sober and balanced assessment of the challenges the United States and other industrial democracies face in the sphere of international migration than that offered in recent years The first part is devoted to a diagnosis of the problem revaluation of the notion of a migration crisis by examining the likely consequences of population growth environmental degradation and political conflict in the developing and post communist worlds Special attention is also given to the manifestations of these forces in the western hemisphere where they may have direct consequences for immigration to the United States In the second part the implications for U S policy are considered ranging from promotion of democracy and development of strategies for minimizing international migrations and refugee flows to the intricacies of humanitarian relief and intervention when preventive measures prove ineffective [Natural Allies?](#) Klepak,1996-06-15 To what extent are Canada and Mexico natural allies in continental and world affairs How will this relationship unfold in terms of security issues in the aftermath of the Cold War These questions were the focus of a workshop held in Mexico City in 1994 from which this book took its themes historical context American influence and potential cooperative security options A process of redefining security concerns in a changing hemisphere is clearly underway and Natural Allies examines economic factors drug trafficking questions of autonomy and strategic alliance and defence priorities as intersecting interests in the Canada Mexico dialogue This is volume two in CHANGING AMERICAS a series published in collaboration with the Canadian Foundation for the Americas FOCAL [Academic Reading - Second Edition](#) Janet Giltrow,2002-03-21 This reader has been designed to accompany Giltrow s Academic Writing one of the key principles of which is that there is a close connection between the processes of reading and of writing academic prose Each reading is preceded by introductory commentary questions and suggestions for discussion and the book also includes a brief general introduction As with Giltrow s Academic Writing her Academic Reading is a challenging text At its core are examples of actual academic writing of the sort that students must learn to deal with daily and to write themselves As newcomers to the scholarly community students can find that community s ways of reading and writing mysterious unpredictable and intimidating Academic Reading demystifies the scholarly genres shedding light on their discursive conventions Throughout Academic Reading respects the student writer it engages the reader s interest without ever condescending and it avoids entirely the arbitrary and the dogmatic The second edition is expanded to include twenty one selections nineteen of which come from scholarly publications and more than half of which are new to this edition
