Oriental The Ancient And The Primitive:

The Oriental, the Ancient and the Primitive Jack Goody, 1990-01-26 Continuing the comparative survey of pre industrial family formation undertaken in *The Development of Family and Marriage in Europe* 1983 Professor Goody looks in depth at kinship practice in Asia His findings cause him to question many traditional assumptions about the primitive East and he suggests that in contrast to pre colonial Africa kinship practice in Asia has much in common with that prevailing in parts of pre industrial Europe Goody examines the transmission of productive and other property in relation both to the prevailing political economy and to family and ideological structures and explores the distribution of mechanisms and strategies of management across cultures The book concludes that notions of western uniqueness are often misplaced and that much previous work on Asian kinship has been unwittingly distorted by the application of concepts and approaches derived from other inappropriate social formations

Modernizing Women Valentine M. Moghadam, 2003 Extrait de la pr face The subject of this study is social change in the Middle East North Africa and Afghanistan its impact on women s legal status and social positions and women s varied responses to and involvement in change processes It also deals with constructions of gender during periods of social and political change Social change is usually described in terms of modernization revolution cultural challenges and social movements Much of the standard literature on these topics does not examine women or gender and thus the author hopes this study will contribute to an appreciation of the significance of gender in the midst of change Neither are there many sociological studies on MENA and Afghanistan or studies on women in MENA and Afghanistan from a sociological perspective Myths and stereotypes abound regarding women Islam and the region and the events of September 11 and since have only compounded them This book is intended in part to normalize the Middle East by underscoring the salience of structural determinants other than religion It focuses on the major social change processes in the region to show how women s lives are shaped not only by Islam and culture but also by economic development the state class location and the world system Why the focus on women It is the author s contention that middle class women are consciously and unconsciously major agents of social change in the region at the vanguard of movements for modernity democratization and citizenship

Wollstonecraft's Daughters Clarissa Campbell Orr, 1996 This work explores Mary Wollstonecraft s 19th century legacy in relation to three themes integral to her work the nature of motherhood religion and the empowerment of women and women s contribution to the sciences of man The introduction provides a comparative framework for French and English women and situates each essay within current historical debates

Listeners Michael Carrithers, Caroline Humphrey, 1991-04-04 The Jains have exerted an influence on Indian society and religion out of proportion with their relatively small numbers The Assembly of Listeners The Jains in Society is the first book to address the sociology of the Jains and to discuss the notion of the community based on religious affiliation in India Topics covered include Jain ideals and identity women in the Jains community popular Jainism Jain reform and Jain identity in the UK This collection is an important theoretical addition to the studies of Indian society which has previously focused mainly on caste and class politics as the fundamental social units With much recent fieldwork providing unique information on the ethnography of the Jains this study will prove indispensable to any scholar interested in this little known but highly influential social group

Art in Theory Paul Wood, Leon Wainwright, Charles Harrison, 2020-12-21 A ground breaking new anthology in the Art in Theory series offering an examination of the changing relationships between the West and the wider world in the field of art and material culture Art in Theory The West in the World is a ground breaking anthology that comprehensively examines the relationship of Western art to the art and material culture of the wider world Editors Paul Wood and Leon Wainwright have included 370 texts some of which appear in English for the first time The anthologized texts are presented in eight chronological parts which are then subdivided into key themes appropriate to each historical era The majority of the texts are representations of changing ideas about the cultures of the world by European artists and intellectuals but increasingly as the modern period develops and especially as colonialism is challenged a variety of dissenting voices begin to claim their space and a counter narrative to western hegemony develops Over half the book is devoted to 20th and 21st century materials though the book's unique selling point is the way it relates the modern globalization of art to much longer cultural histories As well as the anthologized material Art in Theory The West in the World contains A general introduction discussing the scope of the collection Introductory essays to each of the eight parts outlining the main themes in their historical contexts Individual introductions to each text explaining how they relate to the wider theoretical and political currents of their time Intended for a wide audience the book is essential reading for students on courses in art and art history It will also be useful to specialists in the field of art history and readers with a general interest in the culture and politics of the modern world

Marx and Weber on Oriental Societies Lutfi Sunar, 2016-05-06 The Orient was central to the work of Marx and Weber both figures building their theories around the question of why modernity appeared to emerge only in the West While Marx's account focused on the accumulation of capital in the West Weber's explanation for this phenomenon centred on Western rationalization Extending recent work comparing the social theories of Marx and Weber this book examines their approaches to Oriental societies showing how in spite of the differences in their respective theorizations of the historical and political development of the West their work on the form of modern society in the Orient converges each complementing the other Fully conversant with recent scholarly work on Marx

and Weber this comprehensive re examination of the points of convergence and departure in their work requires us to re evaluate both their positions in the history of sociology and their relevance to contemporary social questions As such it will appeal to scholars of social and political theory and classical sociology **Educational Futures** Ivana Milojevic,2005-05-19 This book provides an overview and analysis of current tensions debates and key issues within OECD nations particularly Australia the USA Canada and the UK with regard to where education is and should be going Using a broad historical analysis it investigates ideas and visions about the future that are increasingly evoked to support arguments about the imminent demise of the dominant modern educational model Focusing neither on prediction nor prescription this text suggests the goal is an analysis of the ways in which the notion of the future circulates in contemporary discourse Five specific discourses are explored globalisation new information and communications technologies feminist indigenous and spiritual The book demonstrates the connections between particular approaches to time visions of the future and educational visions and practices The author asserts that every approach to educational change is inherently based on an underlying image of the future *History's Peru* Mark Thurner,2011-02-13 Mark Thurner here offers a brilliant account of Peruvian historiography one that makes a pioneering contribution not only to Latin American studies but also to the history of historical thought at large He traces the contributions of key historians of Peru from the colonial period through the present and teases out the theoretical underpinnings of their approaches He demonstrates how Peruvian historical thought critiques both European history and Anglophone postcolonial theory And his deeply informed readings of Peru s most influential historians from Inca Garcilaso de la Vega to Jorge Basadre are among the most subtle and powerful available in English
