Church,2018-03-03 Excerpt from Analyses of Pig Iron Herewith is presented Volume One of Analyses of Pig Iron which is the first publication of this character ever issued The increasing demand from foundrymen and others for analyses of different kinds of pig iron led the publisher to believe that a work of this kind would deserve the support of makers and melters of iron This work comprises analyses of pig iron made in the United States Great Britain and other countries and also important statistics relative to the production The analyses in nearly every instance were received either from the furnaces direct or from furnace agents and although the publisher realizes that some of them do not seem correct yet they have been copied just as they were received and are on file open to inspection The collecting of these analyses has necessarily opened up a voluminous correspondence several thousand letters having been written to obtain the information contained in this volume and if every furnace had given the desired information a great many more analyses could have been published but some of them declined to give same however the publisher hopes that when the different makers of pig iron see this work they will at once realize its importance and furnish the desired information for the next volume which will be published in the early part of the year 1901 It will contain entirely new matter and will not be a repetition of the matter contained herein The half tone cuts representing the fracture of different brands and grades of pig iron will be interesting as they show the various characteristics of the iron and the accompanying illustrations of furnaces will give the reader a very good idea of the plants where the iron is manufactured About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing
