

well as with effectiveness and efficiency. Drawing on his long and varied experience he is able to illustrate his argument with examples from several branches of medicine, making particular reference to the general need for more randomized controlled trials. The lesson for British psychiatrists is clear: they may draw some comfort from the dilemmas of their psychiatric colleagues elsewhere and from the failings of their medical and surgical colleagues in the United Kingdom, but their own house has still to be put in order.

THE BIOLOGICAL BASES OF BEHAVIOUR Edited by Neil Chalmers, Roberta Crawley, and Steven P. R. Rose (Pp. 318; illustrated; £5.) Harper and Row: London. 1971.

Though psychiatrists are nowadays expected to know something about neurobiology and behaviour they are not always told where to find the relevant information. This book will help them to start looking. It is an Open University set book containing 34 articles chosen to cover material which ranges from structure function and development of the nervous system, to models, machines, and minds, via sensory processes and perception, emotion and motivation, learning, memory, and intelligence, and social behaviour. The contributions, nearly half from *Scientific American*, are authoritative and lucid. The editors have achieved a very useful synthesis.

FROM BIRTH TO SEVEN By Ronald Davie, Neville Butler, and Harvey Goldstein. (Pp. 198; illustrated; £2.00.) Longman: London. 1972.

This book contains the second report of the National Child Development Study. It presents and discusses the results of the seven-year follow-up of a national 'cohort' of some 17,000 babies born in one week of March 1958. Information was obtained about the children by means of educational assessment, parental interview, and medical examination. The main findings are presented clearly enough and serve to underline the need for longitudinal data on child development in a number of disciplines, not least psychiatry.

THE BIOPSYCHOLOGY OF DEVELOPMENT Edited by Ethel Tobach, Lester R. Aronson, and Evelyn Shaw. (Pp. 593; illustrated; £10.50.) Academic Press: New York. 1971.

This book contains the proceedings of a conference organized to celebrate the centennial of the American Museum of Natural History from where, in the department of animal behaviour, the late T. C.

Schneirla made many of his important contributions. The papers of a number of distinguished international participants tackled the unifying theme of behavioural development from various standpoints: genetics, neural growth, biochemistry, psychology, socialization, and the human dilemma. Their edited discussions are also included. Together they provide much factual and speculative material, though it remains unclear why the editors prefer the word 'biopsychology' to 'psychobiology' in the title.

KLINISCHE PSYCHIATRIE I Edited by K. P. Kisker, J.-E. Meyer, M. Muller, and E. Stromgren. (Pp. 1073; DM.236.) Springer: Berlin. 1972.

During the inter-war years the 12 volumes of Bumke's *Handbuch der Geisteskrankheiten* constituted the authoritative source-book for the theory and practice of psychiatry. The five volumes of *Psychiatrie der Gegenwart* published in the 1960s have done much to retain this achievement for the German-reading countries. Here, already, is the second re-written edition of the volume on clinical psychiatry, covering only the functional psychoses, neuroses, personality disorders and child psychiatry, but now so large as to have necessitated a companion volume for the remaining material. Twenty-four of the 26 articles are in German, two in English; a solitary Briton joins a European community of German, Swiss, Austrian, and Scandinavian contributors. The general standard is high, the bibliographies extensive and international.

PSYCHOLOGY IN THE USSR: AN HISTORICAL PERSPECTIVE by J. Brozek, and D. I. Slobin. (Pp. 301; illustrated; \$15.00.) International Arts and Sciences Press: New York. 1972.

This book consists largely in a series of articles by Russian psychologists surveying the state of their subject in the Soviet Union in 1967, 50 years after the revolution. Most of the material has previously appeared in the journal *Soviet Psychology*. The editors, two American psychologists with a special interest in the field, have also provided an introductory section comprising an historical survey, a bibliography, photographs and brief biographies, a transliteration system and a glossary. For the uninitiated reader the volume provides an informative and revealing guide to the subject.

STRESS IN YOUTH By M. Capes, E. Gould, and M. Townsend. (Pp. 103; illustrated; 75p.) Oxford University Press: London. 1971.
