Rosetta Codex:

The Rosetta Codex Richard Paul Russo, 2005-12-06 Cale Alexandros was five years old when the path of his life was irrevocably altered. As the scion of a wealthy and powerful family, he enjoyed a privileged existence until his family's starship was attacked en route to Morningstar, the lone outpost of civilization on a savage planet known as Conrad's World. In an escape ship, Cale crash landed in the wilds and was picked from the wreckage by nomads. For years, Cale is forced to endure life as a slave, sold and shuffled from one group of brutish thugs to another until a trader recognizes a glimmer of promise in Cale's eyes and frees him. Cale travels far and wide, but he never forgets what happened long ago in the desert wastes when, in a strange ancient temple, he found a book with pages made of a strange metal and writings he could not identify. When he finally reaches Morningstar, he comes to realize that the book is a key to understanding a language never heard by mankind: an alien dialect. It also holds a secret that some people want to learn, a treasure that some want for themselves, and a revelation that some will do anything to control.

The Greater Light, 1900 *Ars nova* John L. Nádas, Michael Scott Cuthbert, 2017-07-05 In the early fourteenth century, musicians in France and later Italy established new traditions of secular and sacred polyphony. This *ars nova* or new art, popularized by theorists such as Philippe de Vitry and Johannes de Muris, was the first of many later movements to establish the music of the present as a clean break from the past. The rich music of this period, by composers such as Guillaume de Machaut and Francesco Landini, is not only beautiful but also rewards deep study and analysis. Yet contradictions and gaps abound in the *ars nova* of the fourteenth and early fifteenth centuries: how do we read this music? how do we perform this music? what was the cultural context of these performances? These problems are well met by the ingenuity of approaches and solutions found by scholars in this volume. The twenty-seven articles brought together reflect the broad methodological and chronological range of scholarly inquiry on the *ars nova*.
