**Just War and International Order** Nicholas Rengger, 2013-04-04 At the opening of the twenty first century while obviously the world is still struggling with violence and conflict many commentators argue that there are many reasons for supposing that restrictions on the use of force are growing The establishment of the International Criminal Court the growing sophistication of international humanitarian law and the rebirth of the just war tradition over the last fifty years are all taken as signs of this trend This book argues that on the contrary the just war tradition allied to a historically powerful and increasingly dominant conception of politics in general is complicit with an expansion of the grounds of supposedly legitimate force rather than a restriction of it In offering a critique of this trajectory Just War and International Order also seeks to illuminate a worrying trend for international order more generally and consider what if any alternative there might be to it

Bartlett,2015-09-15 The human story of Battle of Agincourt through the eyes of key participants Polity Consolidation and Military Transformation in Medieval Scandinavia Beñat Elortza Larrea,2023-03-13 In this book Beñat Elortza Larrea analyses the processes of polity consolidation and military transformation in Scandinavia between the early eleventh and early fourteenth centuries Based on a plethora of administrative legal and narrative sources this study examines the development of governance and warfare in Denmark Norway and Sweden and evaluates to which degree European ideas and institutions shaped the budding medieval Scandinavian realms In other words did the formation of these kingdoms stem mostly from European influence were they a by product of a purely Scandinavian ethos or did they largely develop due to historical and geographical circumstances unique to each realm **Reconstruction of Urban Forests** Joe R. McBride,Judith

Stilgenbauer,Igor Lacan,Sheauchi Cheng,Scot Medbury,Deborah L. McBride,2021-01-16 This book will address the destruction of urban forest in nine cities by bombing during World War II and the Bosnian War and their reconstruction in the post war years After reviewing the general objectives and results of aerial bombing the book explores the effects of bombing and the reconstruction of urban forest in London Coventry Hamburg Dresden St Petersburg Stalingrad Tokyo Hiroshima and Sarajevo Sarajevo stands out among these cities because the destruction of its urban forest was the result of citizens cutting down trees for firewood during the siege of the city Most of the cities studied developed plans for reconstruction either during or after the war These plans often addressed the planning and re establishment of the urban forest that had been destroyed Urban planners often planned for infrastructure improvements such as new boulevards and parks where trees would be planted After the war many of these plans were abandoned or significantly modified Cost resistance by property owners control of reconstruction by authorities outside of the cities and the lack of planting stock were factors contributing to the failure of many of the plans Exceptions occurred in Hiroshima and Coventry where the destroyed cities became symbols of national reconstruction and every effort was made to redesign the destroyed portions of these cities as memorials to those who lost their lives and to demonstrate the rebirth of the cities In several of the cities

studied individual citizens undertook on their own the replanting of street and park trees Their ingenuity hard work and dedication to trees in their cities was remarkable A common factor limiting efforts to replant street and park trees was the lack of nursery stock During and immediately after the wars nearly all nurseries that had supplied trees for city planting had been converted to vegetable gardens to produce food for the urban populations The slow return to the production of trees for urban planting was a common factor in the time required in many cities to restore their street and park trees There are lessons to be learned by urban planner urban forester and landscape architects from this book that will be useful in the future destruction of urban forest either by natural or man made causes

Understanding Non-State Actors Eran Zohar,2023-10-24 Understanding Non State Actors aims to reduce the scarcity of academic literature on armed non state actors NSAs that have always been a part of world politics and wars This monograph offers possibly for the first time a systematic historical review as well as a substantive theory of NSAs and their arming efforts The world has been astonished by the ability of the well armed Hamas to inflict heavy losses on the powerful Israel Thus from the Jewish rebellion against Rome to the war between the Ukrainian separatists and the Ukrainian government NSAs weapons acquisition has been vital for the build up of their force enabling both the employment of that force and its sustainability While weapons are not necessarily the most important factor in military build up NSAs need weapons to fight and revolts usually erupt after the organizers have acquired a certain number of weapons Conversely many revolts lose momentum and operations are not carried out or turn ineffective due to shortages of arms and ammunition A major theme of this monograph is that in spite of dramatic political and technological changes armed NSAs in different periods have employed similar methods to acquire weapons Self production looting and stealing external support and the arms trade were always the major ways for NSAs to acquire weapons though the importance of each method and the type of arms has changed remarkably over time Understanding Non State Actors discusses the factors political social cultural technological and organizational that have both facilitated and constrained the ability of NSAs to acquire arms Especially lecturers and students of Military Terrorism
