Remoteness Reconsidered Christopher Rossi, 2021-07-06 Much of our understanding of the world is framed from the perspective of a dominant power center or from standard readings of historical events The architecture of international information distribution academic centers and the lingua franca of international scholarly discourse also shape these stories *Remoteness Reconsidered* employs the idea of remoteness as an analytical tool for viewing international law s encounter with the Americas from the unusual peripheral perspective of the Atacama Desert The Atacama is one of the most remote places on Earth although that less than accurate perspective comes from standard historical accounts of the region accounts that originate from the center Changing the usual frame of reference leads to a reconsideration of the idea of remoteness and of the subsequent marginalization of historical narratives that influence hemispheric international relations in important ways today Lessons about international law s encounters with neoliberalism indigenous and human rights and the management and extraction of mineral resources take on new

significance by following a spatial turn toward the idea of remoteness as applied to the Atacama Desert *Trails of Historic New Mexico* Hunt Janin, Ursula Carlson, 2014-11-21 This is a survey of the major historic trails of New Mexico and other parts of the American Southwest These trails were used by Indians prospectors soldiers buffalo hunters immigrants and cattle and sheep drovers and unlike other more famous Western trails were used as a network of two way trade routes instead of one way avenues for westward migration Introductory chapters highlight prehistoric Indian trails Spanish exploration and Pecos as a microcosm of the old Southwest Each subsequent chapter covers an individual trail describing its history and some of the people who used it A chronology of New Mexico s history and trail system is included as are maps of the most important trails **Historical Atlas of the American West** Warren A. Beck, 1989 The 78 maps in this atlas add significant information to the study of the development of the American West Defined for this resources as those 17 continental states west of the Missouri River The maps range in chronology from explorations in the sixteenth century to the location of World War II prisoner of war and Japanese internment camps The atlas includes maps of geographic flora and fauna data Maps are on the left pages and narratives about the maps re on the facing pages Maps are black and white clear and easily read An Appendix shows Spanish Mexican land grants and there is an index This is an excellent atlas for both middle and high schools Includes a section on Arkansas aboriginal setting and Native American tribes Describes European contacts and settlements
