Paradoxes of Gender Judith Lorber,1994-01-01 In this pathbreaking book a well known feminist and sociologist who is also the Founding Editor of Gender why transvestites transsexuals and hermaphrodites do not affect the conceptualization of two genders and two sexes in Western societies why most of our cultural images of women are the way men see them and not the way women see themselves why all women in modern society are expected to have children and be the primary caretaker why domestic work is almost always the sole responsibility of wives even when they earn more than half the family income why there are so few women in positions of authority when women can be found in substantial numbers in many occupations

and professions why women have not benefited from major social revolutions Lorber argues that the whole point of the gender system today is to maintain structured gender inequality to produce a subordinate class women that can be exploited as workers sexual partners childbearers and emotional nurturers Calling into question the inevitability and necessity of gender she envisions a society structured for equality where no gender racial ethnic or social class group is allowed to monopolize economic educational and cultural resources or the positions of power
