**Russia Looks to the Sea** David Fairhall,1971      Russia Looks Nto the Sea: a Study of the Expansion of Soviet Maritime Power David Fairhall,1971      **Oceans, Seas, Shorelines and Warfare** Richard Harding,Ross Anderson,Mick de Ruyter,2024-09-23 For as long as humanity has ventured on the seas naval warfare has been an integral part of their activities and the focal point for many histories and ideas of heritage This book presents a rarely explored aspect the long term impact of those battles on shorelines seas and oceans Dramatic and altering the physical scars of battles remain with us today in the form of cultural landscapes and archaeological sites while the geopolitical consequences of warfare have been world changing The migrations of peoples across the seas accompanied by violence have done more to shape the demographic and cultural map of the modern world than almost anything else Both seaborne opportunities and threats have influenced the way of life of coastal communities Today technology has seen these threats extend far into the deepest ocean and reach across continents This book shows how despite being virtually invisible to an increasing percentage of the world s population the ocean is more significant now than it has ever been Ranging from the world of antiquity to the present day with a global perspective the volume is intended to appeal to those interested in history archaeology social sciences and the environment      **Problems of Communism** ,1978      Stalin's Ocean-going Fleet Mikhail Monakov,Jurgen Rohwer,2012-11-12 A study of the development of strategic concepts in Stalin s Navy in the context of his foreign defence policy using original archival documents translated from the Russian      **Stalin's Slave Ships** Martin J. Bollinger,2003-09-30 Between 1932 and 1953 a fleet of ordinary cargo ships was pressed into extraordinary service The fleet s task was to relocate approximately one million forced laborers to the Soviet Gulag in Kolyma located along the Arctic Circle in far northeastern Siberia The Kolyma Gulag the most infamous in the Soviet Union was accessible only by sea and the fleet became the lifeblood of the entire operation As one of the largest seaborne movements of people in history this transport took a devastating toll on human lives Bollinger presents the often horrific stories of the Gulag fleet and its passengers and reveals the unwitting role of the United States government in the operation U S shipyards built most of the Gulag fleet and the U S government sold many of the ships used in the transport directly to an agent of the Soviet Union The United States also overhauled and repaired many ships in the Gulag fleet free of charge at the midpoint of their Gulag careers In some cases free ships provided to the Soviet Union under the Lend Lease military assistance program were diverted into Gulag transport duties How much did Washington know about the deadly duty of these ships How many prisoners made the voyage How many never made it out alive Bollinger details this tragic tale using firsthand testimony from those involved in the operation and materials from both American and Russian archives      **Soviet Relations with Latin America, 1959-1987** Nicola Miller,1989-09-14 This book was first published in 1989 The Soviet presence and purposes in Latin America are a matter of great controversy yet no serious study was hitherto combined with a regional perspective concentrating on the

nature and regional impact of Soviet activity on the ground and diplomatic analysis examining the strategic and ideological factors that influence Soviet foreign policy Nicola Miller's lucid and accessible survey of Soviet Latin American relations over the past quarter century demonstrates clearly that existing heavily geo-political accounts distort the real nature of Soviet activity in the area closely constrained by local political social and geographical factors In a broadly chronological series of case studies Dr Miller argues that American counter influence apart enormous physical and communicational barriers obstruct Soviet Latin American relations and that the lack of economic complementarity imposes a natural obstacle to trading growth even Cuba often cited as proof of Soviet designs upon the area is only an apparent exception **Architects**

**of Continental Seapower** Jeremy Stocker, 2020-10-01 This book describes and analyses two iconic figures in twentieth century naval history the German Admiral Alfred von Tirpitz and the Russian Admiral Sergei Gorshkov It examines the men what they thought and wrote about seapower the fleets they created and the strategic consequences of what they did More broadly it draws on the respective histories of the post 1897 Imperial German Navy and the post 1956 Soviet Navy to examine the continental bid for large scale seapower The work argues that both individuals built navies that did not and could not fulfil the objectives for which they were created Drawing on the legacies of both men the book also develops some wider ideas about the creation of large navies by continental states with cautionary lessons for today's emerging powers India and China Both admirals have received book length biographies but this is the first attempt at a comparative study and the first to draw broader strategic lessons from their respective attempts as continental navalists to challenge maritime states This book will be of much interest to students of naval history strategic studies and International Relations

The World Shipbuilding Industry Daniel Todd, 2019-08-13 This book first published in 1985 presents a comprehensive overview of the world shipbuilding industry It contrasts the conditions which foster its development in newly industrialised countries such as Japan South Korea and Brazil with the problems leading to its decline in Western Europe and North America The book discusses the supply and demand factors peculiar to shipbuilding and notes the inherent instability of the industry due to the conditions placed upon it by the economic environment Reactions to this instability are examined from the point of view of both shipbuilding enterprises and governments The book concludes by assessing current trends and discussing likely future developments It is shown that much will depend on shipping costs industrial organisation and the level of state support **National Security, Military Power & the Role of Force in International Relations** United

States. Department of the Army, 1976 **Routledge Library Editions: Transport Economics** Various, 2021-07-29 This set of previously out of print titles is an essential reference collection on the topic of transport economics Providing in depth analysis on a variety of aspects including the economics of the airfreight shipping and rail industries it also examines the economics of road transport and more focused areas such as containerisation **Global Geostrategy** Brian

Blouet,2013-05-13 This is a new examination of Halford Mackinder's seminal global geostrategic work from the perspective of geography diplomatic history political science international relations imperial history and the space age Mackinder was a man ahead of his time He foresaw many of the key strategic issues that came to dominate the twentieth century Until the disintegration of the Soviet Union western defence strategists feared that one power or alliance might come to dominate Eurasia Admiral Mahan discussed this issue in *The Problem of Asia* 1900 but Mackinder made the most authoritative statement in *The Geographical Pivot of History* 1904 He argued that in the closed Heart Land of Euroasia was a strategically placed region with great resources that if controlled by one force could be the basis of a World Empire James Kurth in *Foreign Affairs* has commented that it has taken two World Wars and the Cold War to prevent Mackinder's prophecy becoming reality In World War I and World War II Germany achieved huge territorial gains at the expense of the Russian empire and the Soviet Union In the former conflict the Russian empire was defeated by Germany but the western powers insisted that the territorial gains made by Germany at the treaty of Brest Litovsk be given up In World War II Britain and the US gave material support to Stalin's totalitarian regime to prevent Nazi Germany gaining control of the territory and resources that might have been a basis for world domination The west highly conscious of Mackinder's dictum 1919 that Who rules East Europe commands the Heartland quickly adopted policies to contain the Soviet Union History has therefore proved Mackinder's work to be of vital importance to generations of strategic thinking and he remains a key influence in the new millennium This book will be of great interest to all students and scholars of strategic studies and military history and of geopolitics in particular

No More Heroes Charles Owen,2015-10-05 This book originally published in 1975 and authored by an ex Naval officer assesses the performance and management of the Royal Navy in the twentieth century It examines the nature and tasks of the twentieth century Navy by tracing the fortunes of it under successive First Sea Lords It examines how the higher echelons of the service have altered and how and why naval policy has changed Among other issues the book discusses the actions of Beresford and Fisher Beatty and Jellicoe Chatfield Pound and Mountbatten It appraises Churchill the Invergordon Mutiny and the strains of the 1930s discusses the Navy's role in two World Wars and post war disarmament

Russian Warships in the Age of Sail 1696-1860 Eduard Sozaev,John Tredrea,2010-06-23 Peter the Great created a navy from nothing but it challenged and soon surpassed Sweden as the Baltic naval power while in the Black Sea it became an essential tool in driving back the Ottoman Turks from the heartland of Europe In battle it was surprisingly successful and at times in the eighteenth century was the third largest navy in the world yet its history and especially its ships are virtually unrecorded in the West This major new reference work handsomely fills this gap with a complete and comprehensive list of the fleet with technical detail and career highlights for every ship down to small craft However because the subject is so little

recorded in English the book also provides substantial background material on the organisation and administration of the navy its weapons personnel and shipbuilding facilities as well as an outline of Russias naval campaigns down to the clash with Britain and France known as the Crimean War Illustrated with plans paintings and prints rarely seen outside Russia it is authoritative reliable and comprehensive the culmination of a long collaboration between a Russian naval historian and an American ship enthusiast EDUARD SOZAEV is an established Russian naval historian with a number of books to his credit JOHN TREDREA his translator editor and long term collaborator is an American ship enthusiast with a life long interest in the Russian navy
