Vazir-Mukhtar (Russian Library) Yury Tynyanov, 2021 The Death of Vazir Mukhtar a novel by Yury Tynyanov one of the leading figures of the Russian formalist school describes the final year in the life of Alexander Griboedov the author of the comedy Woe from Wit As ambassador to Persia Griboedov was murdered in 1829 by a Tehrani mob during the sacking of the Russian embassy One of the central texts of Russian formalist literary production the novel is a brilliant meditation on the nature of historical and poetic consciousness and of artistic creation It is a complex and fascinating work that explores the relationships among individual memory historical fact and the literary imagination The result is a hybrid text containing elements of various genres historical biographical existential and adventure novels and a deeply personal almost confessional testament to the writer's relationship to his generation and the state Completed in 1927 almost a century after the events it depicts The Death of Vazir Mukhtar marks the watershed between revolution and reaction At a time when the Soviet regime was becoming increasingly restrictive of freedom of expression and conscience Tynyanov grappled with the themes of disillusionment betrayal and unrealized potential Unabashedly intellectual yet filled with intrigue and suspense The Death of Vazir Mukhtar is a great historical novel of Russian modernism

Youth-Serving Libraries in Japan, Russia, and the United States Lesley S.J. Farmer, N. I. Gendina, Yuriko Nakamura, 2012 In recent years interest in International Librarianship has grown rapidly and will continue to grow as globalization influences education and librarianship In countries around the world public and school libraries have unique roles and their staffs collaborate across types of libraries to varying degrees Library staff preparation training and ongoing learning and organization of youth serving librarians mirror each country's values and priorities The essays in Youth Serving Libraries in Japan Russia and the United States address the universal and culture specific aspects of library services to children and teens in these three

countries This collection shows how libraries have developed in light of each country's political, educational, and social history. They examine how government and citizen roles in youth serving libraries also reflect culturally defined social structures. The chapters highlight unique collections and services within each country and also show how librarians deal with the challenges they encounter both from within their culture as well as from outside including natural disasters. Each country's authors discuss contemporary issues that face youth serving libraries such as information literacy, reading in a multimedia world, and the overarching influence of technology. This book will be of interest to youth serving librarians around the world, library educators, and for those studying international and young adult librarianship.

A History of Modern Librarianship Pamela Spence Richards, Wayne A. Wiegand, Marija Dalbello, 2015-05-26 A broad comparative history of librarianship, this intriguing work goes beyond the standard focus on institutions and collections to help you explore the part modern librarianship played and continues to play in forming Western cultures. Previous histories of libraries in the Western world, the last of which was published nearly 20 years ago, concentrate on libraries and librarians. This book takes a different approach. It focuses on the practice of librarianship, showing you how that practice has contributed to constructing the heritage of cultures. To do so, this groundbreaking collection of essays presents the history of modern librarianship in the context of recent developments of the library institution, professionalization of librarianship, and innovation through information technology. Organized by region, the book addresses the widely recognized international impact of Anglo-American librarianship and its continuing influence over the past century, combining critical analysis with chronological histories of modern librarianship in Europe, North America, Australia, New Zealand, and Africa. An introductory chapter explains the origins of the project, and a concluding chapter examines the effects of digitization on modern librarianship in the 21st century.

International Encyclopedia of Information and Library Science John Feather, Rodney Paul Sturges, 2003 The *International Encyclopedia of Information and Library Science* was published to widespread acclaim in 1996 and has become the major reference work in the field. This eagerly awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the Encyclopedia was originally conceived. With nearly 600 entries written by a global team of over 150 contributors, the subject matter ranges from mobile library services provided by camel and donkey transport to search engines, portals, and the World Wide Web. The new edition retains the successful structure of the first, with an alphabetical organization providing the basic framework of a coherent collection of connected entries. Conceptual entries explore and explicate all the major issues, theories, and activities in information and library science, such as the economics of information and information management. A wholly new entry on information systems and enhanced entries on the information professions and the information society are key features of this new edition. Topical entries deal with more specific subjects such as collections management and information services for ethnic minorities. New or completely
