Balmaceda, 2021-05-11 Russia's use of its vast energy resources for leverage against post Soviet states such as Ukraine is widely recognized as a threat Yet we cannot understand this danger without also understanding the opportunity that Russian energy represents From corruption related profits to transportation fee income to subsidized prices many within these states have benefited by participating in Russian energy exports To

understand Russian energy power in the region it is necessary to look at the entire value chain including production processing transportation and marketing and at the full spectrum of domestic and external actors involved from Gazprom to regional oligarchs to European Union regulators This book follows Russia s three largest fossil fuel exports natural gas oil and coal from production in Siberia through transportation via Ukraine to final use in Germany in order to understand the tension between energy as threat and as opportunity Margarita M Balmaceda reveals how this dynamic has been a key driver of political development in post Soviet states in the period between independence in 1991 and Russia s annexation of Crimea in 2014 She analyzes how the physical characteristics of different types of energy by shaping how they can be transported distributed and even stolen affect how each is used not only technically but also politically Both a geopolitical travelogue of the journey of three fossil fuels across continents and an incisive analysis of technology s role in fossil fuel politics and economics this book offers new ways of thinking about energy in Eurasia and beyond

Continuity and Change in the Baltic Sea Region David J. Galbreath,Ainius Lašas,Jeremy W. Lamoreaux,2008-01-01 Continuity and Change in the Baltic Sea Region uncovers the Baltic States foreign policy transition from Socialist Republics to EU member states Situated between the Russian Federation and Northern Europe Estonia Latvia and Lithuania have had to manoeuvre within an often delicate sub region Since independence the foreign policies of the Baltic States have been dominated by de Sovietization and European integration Lying at the crossroads between small state theory and identity politics this analysis engages with the development of Baltic foreign policies as post Soviet small and transitioning states The

authors argue that Estonia Latvia and Lithuania dictated their early foreign policy agendas based on a process of identity construction and as a response to their regional environment This process took the Baltic States from East to West in their foreign policy aspirations Key factors in foreign policy making and implementation are discussed as well as external factors that shaped Baltic foreign policy agendas Overall the book illustrates how continuity and change in the Baltic foreign policies has been shaped by both hard and soft factors It is a study in the foreign policies of transitioning states and in this regard illuminates a much larger research area beyond its geographic focus
