with practices of representing art history in various media This includes post Hegelian texts and engravings of art history from the 1840s onwards by Franz Kugler Julius Schnorr and others In addition works of art of the late twentieth century by Andy Warhol Anselm Kiefer and others provide opportunities to speculate on the after effects and discursive traces of the old regime Extending the concept of historiography to include not just textual or institutional endeavours but a host of different images as well from reproductive prints to pop paintings and visual archives of the digital era this study is intended to contribute in new ways to a critical historiography of the field of art history and visual culture today
