This book critically investigates our contemporary time crisis The transformation of society from an agrarian to an industrial and finally an urbanized way of living and working has created a fundamental change in our understanding of time a 24 7 mentality The move from natural time to the digital age leads to a fragmentation of time that deeply affects our daily biological and social rhythm We need a new approach to time to overcome our temporal system of clocks and calendars This book investigates a new perception of time by exploring the concept of uchronia a term derived from the Greek u topos and meaning no time or non time Uchronia is a way of questioning speculating on and designing new kinds of temporal systems that are more about being in tune than on time Educational Times and Journal of the College of Preceptors ,1922
