Science Criticism

Gunnar Andersson

Science Criticism:

Criticism and the History of Science Gunnar Andersson, 1994 Criticism and the History of Science deals with Thomas Kuhn's Imre Lakatos's and Paul Feyerabend's criticism of Karl Popper's falsificationist conception of science. It argues that this criticism is based on two important methodological problems: the problem that observations and best statements are fallible and impregnated with theory, and the problem of how to test complex theoretical systems. In order to solve these problems, it shows how problematic test statements can be criticised and whole theoretical systems falsified. In this way, the falsificationist conception of science is developed and defended in a way making a deeper understanding of science and its history possible.

Constructivism in Science Education Michael R. Matthews, 1998-02-28

Constructivism is one of the most influential theories in contemporary education and learning theory. It has had great influence in science education. The papers in this collection represent arguably the most sustained examination of the theoretical and philosophical foundations of constructivism yet published. Topics covered include orthodox epistemology and the philosophical traditions of constructivism, the relationship of epistemology to learning theory, the connection between philosophy and pedagogy in constructivist practice, the difference between radical and social constructivism, and an appraisal of their epistemology, the strengths and weaknesses of the Strong Programme in the sociology of science, and implications for science education. The book contains an extensive bibliography. Contributors include philosophers of science, philosophers of education, science educators, and cognitive scientists. The book is noteworthy for bringing this diverse range of disciplines together in the examination of a central educational topic.

The Saturday Review of Politics, Literature, Science, Art, and Finance ,1913 *Paul and Patronage* Joshua

Rice,2013-07-22 The question of how leadership and authority functioned in the Pauline church remains one of the most polarizing issues in New Testament scholarship today On the one side are egalitarian and counterimperial readings that stake their interpretation of the liberating gospel upon a depiction of the Pauline church as radically countercultural with regard to leadership and authority On the other side are authoritarian readings that just as easily conceive of Paul as fully embedded within the cultural conceptions and structures of leadership and authority in vogue across the Greco Roman world This study employs social science criticism to construct a model of ancient patronage conventions and power exchange dynamics in the Greco Roman world and this model is then applied to 1 Corinthians This study finds that when Paul addresses his own apostolic relationship to the Corinthians he tends toward reinscribing traditional hierarchies but that when Paul addresses relationships between participants of the Corinthian assembly he tends toward overturning them
