Self-awareness M. D. Ferrari,Robert J. Sternberg,1998-04-17 This integrative volume brings together leading social scientists to present diverse perspectives on the emergence development and practical role of self awareness Shedding light on the fundamental question of how human beings come to understand who we are in relation to ourselves to others and to the broader world the book does justice to the complexity of its subject while remaining accessible to readers in a wide range of disciplines Chapters cover such topics as developmental and evolutionary aspects of self awareness the self consciousness and theory of mind and connections between self awareness and social affective academic and neuropsychological functioning *Human Understanding as Problem* Jesús Padilla Gálvez,Margit Gaffal,2018-11-05 The problems associated

with understanding come to light in many facets of our lives This volume is dedicated to describing these facets and clarifying problems related to levels of comprehension conceptual analysis understanding oneself and the other as well as cultural aspects of understanding The authors address the topic in different theoretical frames such as hermeneutics phenomenology transcendental and analytic philosophy **Memory and the Self** Mark Rowlands,2016-10-14 The idea that our memories in some sense make us who we are is a common one and not at all implausible After all what could make us who we are if not the things we have experienced thought felt and desired on these idiosyncratic pathways through space and time that we call lives And how can we retain these experiences thoughts feelings and desires if not through memory On the other hand most of what we have experienced has been forgotten And there is now a considerable body of evidence that suggests that even when we think we remember our memories are likely to be distorted sometimes beyond recognition Imagine writing your autobiography only to find that that most of it has been redacted and much of the rest substantially

rewritten What would hold this book together What would make it the unified and coherent account of a life The answer Mark Rowlands argues lies partially hidden in a largely unrecognized form of memory Rilkean memory A Rilkean memory is produced when the content of a memory is lost but the act of remembering endures in a new mutated form a mood a feeling or a behavioral disposition Rilkean memories play a significant role in holding the self together in the face of the poverty and inaccuracy of the contents of memory But Rilkean memories are important not just because of what they are but also because of what they were before they became such memories Acts of remembering sculpt the contents of memories out of the slabs of remembered episodes Our acts of remembering ensure that we are in the content of each of our memories present in the way a sculptor is present in his creation even when this content is lamentably sparse and endemically inaccurate *Markers of Psychosocial Maturation* Mufid James Hannush, 2021-07-15 This book advances an integrative approach to understanding the phenomenon of psychosocial maturation Through a rigorous dialectically informed interpretation of psychoanalytic and humanistic existential phenomenological sources Mufid James Hannush distills thirty essential markers of maturity The dialectical approach is described as a process whereby lived affect and value laden polar meanings are transformed through deep insight into complementary and integrative meta meanings The author demonstrates how responding to the call of maturation can be viewed as a life project that serves the ultimate purpose of living a balanced life The book will appeal to students and scholars of human development psychotherapy social work philosophy and existential humanistic and phenomenological psychology

Philosophical Hermeneutics Hans-Georg Gadamer, 1977 This volume presents carefully selected essays from Gadamer s *Kleine Schriften* The seven essays comprising Part 1 contain Gadamer s discussion of hermeneutical reflection

Part 2 consists of six essays dealing with phenomenology existential philosophy and philosophical hermeneutics **Agency, Freedom, and Responsibility in the Early Heidegger** Hans Pedersen, 2020-08-25 This book employs Heidegger's work of the 1920s and early 1930s to develop distinctively Heideggerian accounts of agency freedom and responsibility making the case that Heidegger's thought provides a compelling alternative to the mainstream philosophical accounts of these concepts Hans Pedersen demonstrates that Heidegger's thought can be fruitfully used to develop a plausible alternative understanding of agency that avoids the metaphysical commitments that give rise to the standard free will debate The first several chapters are devoted to working out an account of the ontological structure of human agency specifically focusing on the Heideggerian understanding of the role of mental states causal explanations and deliberation in human agency arguing that action need not be understood in terms of the causal efficacy of mental states In the following chapters building on the prior account of agency Pedersen develops Heideggerian accounts of freedom and responsibility Having shown that action need not be understood causally the Heideggerian view thereby avoids the conflict between free will and determinism that gives rise to the problem of free will and the correlative problem of responsibility *Life and Mind* José Manuel Viejo, Mariano Sanjuán, 2023-06-12 This volume provides a broad overview of some cutting edge philosophical topics of growing interest at the juncture between cognitive science and biology The main goal is not to integrate the variety of approaches into a single account but rather to offer diverse perspectives on a collection of selected biological issues of particular philosophical relevance reflecting the plurality of current research in these areas Four conceptual vectors give this volume its coherence Animal and human cognition With respect to animal cognition this volume focuses on self awareness and methodological flaws in the science of animal consciousness Regarding human cognition the authors of this volume address various aspects of so called 4E cognition Genetics The role of genes in the development of mind and life has always been philosophically controversial In this volume the authors address the possibility of considering post genomic genes as natural kinds and the proper analysis of the concept of genotype Teleology This volume addresses issues of evolutionary causality and teleosemantics as well as questions relating to biological teleology and regulation Evolution Evolution exemplifies better than any other concept the convergence point between philosophy biology and cognitive sciences Among other things the volume deals with the origin of novelties in evolutionary processes from various viewpoints e g cultural evolution and developmental plasticity Despite their disparity all these topics belong to a common naturalistic framework By presenting them in a single volume the editors want to emphasize the need to always conduct philosophical research on mind and life with tangential domains in mind This book is a valuable resource for students and researchers of philosophy with a special interest in life cognition and evolution as well as for biologists and cognitive scientists **Hermeneutics and Education** Shaun Gallagher, 1992-10-01 Shaun Gallagher is Associate Professor of Philosophy at Canisius College and co editor of the forthcoming book Merleau Ponty Hermeneutics and Postmodernism which will be published by SUNY Press *The Meaning*

of Religious Freedom Franklin I. Gamwell, 1995-02-01 The endorsement of religious freedom in the first amendment to the Constitution of the United States represents a modern revolution in the relation between politics and religion In American politics there has been continual disagreement about the meaning of this constitutional principle and widely held views of religious freedom include much philosophical confusion This book shows how a plurality of religious convictions can be politically united only by a free debate among different religious convictions The author demonstrates that religious freedom is a coherent political principle and that this principle is the defining democratic commitment because all other political principles should be subject to assessment by the same free debate characterizing religious freedom This book identifies the meaning of an authentically democratic constitution and the civility required of democratic citizens *Thinking with Kierkegaard* Arne Grøn, 2022-12-31 Arne Grøn's reading of Søren Kierkegaard's authorship revolves around existential challenges of human identity The 35 essays that constitute this book are written over three decades and are characterized by combining careful attention to the augmentative detail of Kierkegaard's text with a constant focus on issues in contemporary philosophy Contrary to many approaches to Kierkegaard's authorship Grøn does not read Kierkegaard in opposition to Hegel The work of the Danish thinker is read as a critical development of Hegelian phenomenology with particular attention to existential aspects of human experience Anxiety and despair are the primary existential phenomena that Kierkegaard examines throughout his authorship and Grøn uses these negative phenomena to argue for the basically ethical aim of Kierkegaard's work In Grøn's reading Kierkegaard conceives human selfhood not merely as relational but also a process of becoming the self that one is through the otherness of self experience that is the body the world other people and God This book should be of interest to philosophers theologians literary studies scholars and anyone with an interest not only in Kierkegaard but also in human identity **Between Reason and History** David S. Owen, 2002-07-18 The first book length treatment in English of Habermas's theory of social evolution and progress **Ricoeur, Culture, and Recognition** Timo Helenius, 2016-08-26 Ricoeur Culture and Recognition A Hermeneutic of Cultural Subjectivity presents Paul Ricoeur's work from its beginning to its end as a form of a cultural theory Timo Helenius proposes a cultural hermeneutic that clarifies the cultural facilitation in a person's process of attaining a sense of being a human Incorporating insights from Kant Hegel and Heidegger this exploration of human beings as being profoundly formed and influenced by the cultural condition also enables a new understanding of intercultural questions by revealing the common human condition that the various cultures manifest Ricoeur Culture and Recognition will be of interest not only to philosophers but also to scholars in theology linguistics cultural studies and the social sciences **Spinoza and the Sciences** Marjorie Grene, Debra Nails, 2012-12-06 Prefatory Explanation It must be remarked at once that I am editor of this volume only in that I had the honor of presiding at the symposium on Spinoza and the Sciences at which a number of these papers were presented exceptions are those by Hans Jonas Richard Popkin Joe VanZandt and our four European contributors in that I have given some editorial advice on details

of some of the papers including translations and finally in that my name appears on the cover The choice of speakers and of additional contributors is entirely due to Robert Cohen and Debra Nails and nearly all the burden of readying the manuscript for the press has been borne by the latter In the introduction to another anthology on Spinoza I opened my remarks by quoting a statement of Sir Stuart Hampshire about interpretations of Spinoza's chief work All these masks have been fitted on him and each of them does to some extent fit But they remain masks not the living face They do not show the moving tensions and unresolved conflicts in Spinoza's Ethics Hampshire 1973 p 297 The double theme of moving tensions and unresolved conflicts seems even more appropriate to the present volume What is Spinoza's relation to the sciences The answers are many and they criss cross one another in a number of complicated ways
