Murder and Difference Mieke Bal,1988-02-22 an important contribution to current literary concerns with the ideologies of texts Society of Old Testament Study Book List she points the way into as yet little explored territory broadly engaging literary theory as well as ideological criticism she moves beyond both narrowly historical and exclusively text centered criticism Theology Today Bal has given us both a coruscating feminist critique of biblical scholarship and a fund of provocative exegetical insights required reading for anyone who wants to know where serious biblical scholarship is heading Shofar **A la recherche du sens** Denise François-Geiger,1990 Peeters 1990 Theories of Translation Rainer Schulte,John Biguenet,2017-12-12 Spanning the centuries from the seventeenth to the twentieth and ranging across cultures from England to Mexico this collection gathers together important statements on the function and feasibility of literary translation The essays provide an overview of the historical evolution in thinking about translation and offer strong individual opinions by prominent contemporary theorists Most of the twenty one pieces appear in translation some here in English for the first time and many difficult to find elsewhere Selections include writings by Scheiermacher Nietzsche Ortega Benjamin Pound Jakobson Paz Riffaterre Derrida and others A fine companion to The Craft of Translation this volume will be a valuable resource for all those who translate those who teach translation theory and practice and those interested in questions of language philosophy and literary theory *Synchronic Romance Linguistics* Rebecca Posner,John N. Green,2011-04-20 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing **The Semiotic Sphere** Thomas A. Sebeok,Jean Umiker-Sebeok,2012-12-06 Although semiotics has in one guise or another ftourished uninterruptedly since pre Socratic times in the West and important semiotic themes have emerged and devel oped independently in both the Brahmanie and Buddhistic traditions semiotics as an organized undertaking began to 100m only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much ofEurope Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the litera te globe Different places strategically allied themselves with different lega eies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their

comparative analysis and their classifi cation More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is inherent in the advent ure of the search itself **Writings in General Linguistics** Ferdinand de Saussure,2006 Ferdinand de Saussure s Cours de linguistique g n rale was posthumously composed by his students from the notes they had made at his lectures The book became one of the most influential works of the twentieth century giving direction to modern linguistics and inspiration to literary and cultural theory Before he died Saussure told friends he was writing up the lectures himself but no evidence of this was found Eighty years later in 1996 a manuscript in Saussure s hand was discovered in the orangerie of his family house in Geneva This proved to be the missing original of the great work It is published now in English for the first time in an edition edited by Simon Bouquet and Rudolf Engler and translated and introduced by Carol Sanders and Matthew Pires all leading Saussure scholars The book includes an earlier discovered manuscript on the philosophy of language Saussure s own notes for lectures and a comprehensive bibliography of major work on Saussure from 1970 to 2004 It is remarkable that for eighty years the understanding of Saussure s thought has depended on an incomplete and non definitive text the sometimes aphoristic formulations of which gave rise to many creative interpretations and arguments for and against Saussure Did he or did he not see language as a social and a historical Did he or did he not rule out the study of speech within linguistics Was he a reductionist These disputes and many others can now be resolved on basis of the work now published This reveals new depth and subtetly in Saussure s thoughts on the nature and complex workings of language particularly his famous binary oppositions between form and meaning the sign and what is signified and language langue and its performance parole Towards the Multilingual Semantic Web Paul Buitelaar,Philipp Cimiano,2014-11-13 To date the relation between multilingualism and the Semantic Web has not yet received enough attention in the research community One major challenge for the Semantic Web community is to develop architectures frameworks and systems that can help in overcoming national and language barriers facilitating equal access to information produced in different cultures and languages As such this volume aims at documenting the state of the art with regard to the vision of a Multilingual Semantic Web in which semantic information will be accessible in and across multiple languages The Multilingual Semantic Web as envisioned in this volume will support the following functionalities 1 responding to information needs in any language with regard to semantically structured data available on the Semantic Web and Linked Open Data LOD cloud 2 verbalizing and accessing semantically structured data ontologies or other conceptualizations in multiple languages 3 harmonizing integrating aggregating comparing and

repurposing semantically structured data across languages and 4 aligning and reconciling ontologies or other conceptualizations across languages The volume is divided into three main sections Principles Methods and Applications The section on Principles discusses models architectures and methodologies that enrich the current Semantic Web architecture with features necessary to handle multiple languages The section on Methods describes algorithms and approaches for solving key issues related to the construction of the Multilingual Semantic Web The section on Applications describes the use of Multilingual Semantic Web based approaches in the context of several application domains This volume is essential reading for all academic and industrial researchers who want to embark on this new research field at the intersection of various research topics including the Semantic Web Linked Data natural language processing computational linguistics terminology and information retrieval It will also be of great interest to practitioners who are interested in re examining their existing infrastructure and methodologies for handling multiple languages in Web applications or information retrieval systems   **Le signifié de langue en espagnol** Gilles Luquet,2006 La question des rapports signifiant signifi dans la description de la langue espagnole est l origine d une r flexion commune lors des journ es d tude qui ont eu lieu en mars 2005 Paris   **Revue Canadienne Des Langues Vivantes** ,1983   Quoting Caravaggio Mieke Bal,2001-03 The author s primary object of investigation in this text is not the Caravaggio but rather the issue of temporality in art She analyzes the productives relationship between Caravaggio and a number of late 20th century artists who quote the baroque master in their own works   **Sémantique synchronique** Henry G.
