Long Run:

The Long Run Catriona Menzies-Pike, 2016-03-01 No one ever expected Catriona Menzies Pike to run a marathon She hated running and was a hopeless athlete When she was twenty her parents died suddenly and for a decade she was stuck She started running on a whim and finally her grief started to move too Until very recently it was frowned upon for women to run long distances Running was deemed unladylike and probably dangerous How did women s running go from being suspect to wildly popular How does a high school klutz become a marathon runner This fascinating book combines memoir and cultural history to explore the rich and contradictory topic of women and running

Living in the long run Dr. Patrick Krause, 2024-04-26 How do you want to run a marathon in under four hours or at the age of 90 To take Arne Haase as a role model Germany s oldest marathon runner is still doing 20 kilometers twice a week at the age of 90 And it doesn t have to be that sporty But wouldn t the Haase model be a nice vision of you in your old days being trapped in the body of a 45 year old For millions of people regular exercise is part of their lives But almost all of us run the wrong way To stay mobile from now until old age we can make up our minds for a fundamental change E g we mostly unconsciously run as if we were training for a competition From the age of 40 our strength and joints start to deteriorate So what can we change in order to enjoy it forever Change our running attitude running mindfully reduce our biological age Food for thought from philosophy psychology and coaching leads to a lifestyle that keeps you strong and healthy forever One reading session and you re off and running Living in the long Run is neither a motivational guide nor a training companion just read it put it down and start a new life The inspiring narrative running coach invites you to take things radically slowly but to take the first small step towards almost infinity Because endurance matters Running properly starts in your mind In order to still be strong at the age of 90 author Dr Patrick Krause tears down the performance patterns from our sporting past as well as our modern society running or any other fitness sport should ultimately glide into the flow beyond all logic of increase our bones will be grateful How does that kind of stress reduced running work More like a meditation to go with the flow and that s also how the book is written Because running properly starts in your mind This means eliminating opponents such as some fellow runners and potential tempo tyrants like watches and apps which focus on competition and the logic of improvement It s about consciously taking every mental and athletic step Valuable companions on the short path to an eternal running life are techniques from meditation and philosophy as well as impulses from other sports and training aspects for long distances Because those who train like iron triathletes can surpass themselves you bet Living in the long Run combines running with joie de vivre in an instructive and entertaining way both immediately and long term

Temporary Equilibrium and Long-Run Equilibrium (Routledge Revivals) Willem H. Buiter, 2014-06-27 This title first published in 1979 presents the Ph D thesis of the world renowned economist and financial

expert Willem Buiter In Part I three alternative specifications of temporary equilibria in asset markets including their implications for macroeconomic models are discussed Part II examines the long term implications of some short term macroeconomic models The analysis of the theoretical foundations of direct crowding out and indirect crowding out is particularly prominent with the result that a synthesis of short term macroeconomic analysis and long term growth theory is formulated The traditional tools of comparative dynamics and stability analysis are employed frequently However it is also argued that the true scope of government policy can only be adequately evaluated with the aid of concepts such as dynamic and static controllability Temporary Equilibrium and Long Run Equilibrium is a valuable study and relevant for all serious students of modern economic theory

In It for the Long Run Vanessa Stroud, Scott Ludwig, 2012-09-27 Multiple races of marathon distance or greater in a month or perhaps in a weekend Several unsupported runs of 50 and 100 miles through the mountains and forests several times a year Have you ever considered running through a desert across a frozen tundra or over multiple mountain ranges Why not run for three days straight to see how many miles you can accrue Welcome to a place where no locale is too inhospitable and no distance impossible Welcome to the Darkside The Darkside Running Club established in 2002 is a place where runners meet to express their love for distance running and camaraderie by spending countless hours and miles committed to doing what they enjoy most They share a singular focus towards achieving goals far off in the distance both literally and figuratively With their dedication and commitment you may believe the Darksider to be a professional athlete or perhaps an Olympian But you would be wrong they are simply ordinary people doing extraordinary things in the sport they love running Highly competitive while never taking themselves too seriously they strive to shave off minutes or perhaps hours while adding a mile or two or twenty while pushing their limits further and further The impossible becomes possible dreams become reality They won't take no for an answer as they persevere to move beyond physical and emotional discomfort to finish what they started Excuses don't exist Their passion is contagious So reader be warned they're in it for the long run

Longrun Dynamics G. Snooks, 1998-04-08 Longrun Dynamics is a ground breaking work that begins where the author's Economics without Time 1993 left off It employs the inductive method proposed by J S Mill to develop a general dynamic theory that integrates the separate disciplines of economic growth economic fluctuations and political decision making The central feature of this general theory is dynamic demand which provides both a realist form for the model and a new explanation of macroeconomics variables The general theory also provides an entirely new basis for policy and is designed to counter the influence of neo liberalism in economic theory
