Berberoglu, 2016-04-15 The deep economic recession that has occurred in all major sectors of the U S and global economy is a manifestation of the underlying contradictions of the capitalist system that has resulted in the accumulation of vast fortunes on one side and impoverishment debt and destitution on the other In short the crisis of global capitalism is the result of the immense disparities in wealth and income and a consequent widening gap between capital and labor This ground breaking book brings together a team of experts on the contemporary global capitalist political economy who are able to shed light on the inner workings of global capitalism and the capitalist globalization process that has led to the growth and development of capitalism from the national to the global level with all its fundamental internal dynamics and contradictions operating on a world scale It will make an important contribution to understanding the underlying causes of the current global economic crisis and show the way out of this crisis by way of a powerful critique of the global capitalist system that will ultimately go through a major economic political and social transformation Analysis of the global capitalist crisis raises questions regarding the process of capitalist globalization especially now that neoliberal economic policies have failed Does this signal the end of capitalist globalization and the collapse of the global capitalist system This book will take up these questions and entertain the possibility of a new beginning in the global political economy through an analysis of the next period of post capitalist developments worldwide that may set the stage for the rise of socialism across the globe **The**

Bagley, 2016-01-29 Current perspectives on Latin America s role in the world tend to focus on one question Why is Latin America always falling behind Analysts and scholars offer answers grounded in history economic underdevelopment or democratic consolidation Bagley and Horwitz however shift the central question to ask why and to what extent does Latin America matter in world politics both now and in the future This text takes a holistic approach to analyze Latin America s role in the international system It invokes a combination of global regional and sub regional levels to assess Latin America s insertion into a globalized world in historical contemporary and forward looking perspectives Conventional international relations theory and paradigms introduced at the beginning offer a useful lens through which to view four key themes political economy security transnational issues and threats and democratic consolidation The full picture presented by this

book breaks down the evolving power relationships in the hemisphere and the ways in which conflict and cooperation play out through international organizations and relations

Imperialism and Capitalism in the Twenty-First Century

James Petras, Henry Veltmeyer, Humberto Márquez, 2016-05-13 We live in a time of dynamic but generally regressive regime change a period in which major political transformations and a rollback of a half century of legislation are accelerated under conditions of a prolonged and deepening economic crisis and a worldwide offensive against the citizenry and the working class Written by two of the world's leading left wing thinkers Imperialism and Capitalism in the Twenty First Century takes the form of a number of analytical probes into some of the dynamics of capitalist development and imperialism in contemporary conditions of a system in crisis It is too early to be definitive about the form that capitalism and imperialism and socialism might be or is taking as we are in but the early stages of a new developmental dynamic the conditions of which are too complex to anticipate or grasp in thought they require a closer look and much further study from a critical development and Marxist perspective The purpose of this book is to advance this process and give some form to this perspective
