Curriculum development occupied an increasingly important place on the educational scene in the mid 1960s foreshadowing much of the national debate initiated by the Prime Minister of Britain in late 1976 The agencies for development take different forms in different countries but the underlying issues are remarkably similar across the globe It is the basic framework common to all planned curriculum change which The Politics of Curriculum Change originally published in 1978 is concerned to bring into sharper focus A major consideration in embarking on or analysing any curriculum programme is the extent to which it reflects public concerns about education The notion of the public curriculum is a central strand in the authors argument It leads naturally into a discussion of mechanisms for control and development and the political acceptability of new proposals to teachers parents pupils and the public at large But curriculum change has its internal as well as its external politics These are reflected in the contrasting styles of development varied forms of evaluation and in the conflicting response of the profession both to change of the curriculum as a whole and to a piecemeal subject by subject approach The authors give these working aspects of curriculum development as careful attention as they afford to the larger issues of schooling in society All in all this book offers a view which has not hitherto been clearly articulated but which is essential to understanding what curriculum development is all about Its authors are in a good position to do this one had a particularly close involvement with the external and the other with the internal politics of development and they previously worked together on an international study of curriculum *The British National Bibliography* Arthur James Wells, 1998
