Heritage, Communities and Archaeology Laurajane Smith, Emma Waterton, 2013-11-20. This book traces the development of community archaeology, identifying both its advantages and disadvantages by describing how and why tensions have arisen between archaeological and community understandings of the past. The focus of this book is the conceptual disjunction between heritage and data and the problems this poses for both archaeologists and communities in communicating and engaging with each other. In order to explain the extent of the miscommunication that can occur, the authors examine the ways in which a range of community groups, including communities of expertise, define and negotiate memory and identity. Importantly, they explore the ways in which these expressions are used or are taken up in struggles over cultural recognition and ultimately the practical, ethical, political, and theoretical implications this has for archaeologists engaging in community work. Finally, they argue that there are very real advantages for archaeological research theory and practice to be gained from engaging with communities.

A Future for Archaeology Robert Layton, Stephen Shennan, Peter Stone, 2016-09-16. Over the last thirty years, issues of culture, identity, and meaning have moved out of the academic sphere to become central to politics and society at all levels, from the local to the global. Archaeology has been at the forefront of these moves towards a greater engagement with the non-academic world, often in an extremely practical and direct way, for example in the disputes about the repatriation of human burials. Such disputes have been central to the recognition that previously marginalized groups have rights in their own past that are important for their future. The essays in this book look back at some of the most important events where a role for an archaeology concerned with the past in the present first emerged and look forward to the practical and theoretical issues now central to a socially engaged discipline and shaping its future. This book is published in honor of Professor Peter Ucko, who has played an unparalleled role in promoting awareness of the core issues in this volume among archaeologists.

Archaeology and Heritage Management Usman Ali, 2021. This volume reconsiders the World Heritage Guidelines to manage cultural and natural heritage sites effectively. The study approaches this in two ways. The first is by evaluating and analyzing the fundamental theories and practice of heritage with comparison to World Heritage prescribed parameters for effective management, particularly authenticity, and the second is about to rereview the international legislation in the context of authenticity of heritage practice as a part of understanding and developing new parameters for conservation/preservation.
