Looking At Art Landscape And Nature:

Looking at the Landscapes The J. Paul Getty Museum, 2007-12-31 In this daylong symposium a group of international experts and scholars of nineteenth century art gathered to discuss Courbet's landscape oeuvre and debate his contribution to the history of modern painting in conjunction with the exhibition Courbet and the Modern Landscape The preface by Mary Morton and five papers presented here comprise the J Paul Getty Museum's first online only publication **Looking at Nature, Looking at Art** Dundee (Scotland). Museums & Art Galleries Department, 1991 [The Nature of Landscape](#) Han Lörzing, 2001 **Landscape and Nature in Scandinavian Art** MaryClaire Pappas, Tonje Haugland Sørensen, 2025-04-16

This edited volume foregrounds new and vital scholarship shaping Scandinavian art historical research on the representations of the natural world Contributors deconstruct the interlinking of people and land through critical readings of the Scandinavian representation of nature bringing to the fore how the traditional focus on the landscape as a manifestation of temperament has tended to obfuscate critical approaches to the representation of the landscape Making interdisciplinary connections this volume redresses the imbalance in scholarship on the region that often emphasizes teleological national narratives and instead situates encounters with nature and the landscape in relationship to more interdisciplinary perspectives Each chapter serves as a specific case study on topics ranging from circumpolar exploration and colonial practices deconstructing National Romanticism myths and contemporary artistic responses to the history of the politics of land The book will be of interest to scholars working in art history visual culture nature studies and environmental history

Science, Technology and Culture Anne Balsamo, 2017-11-01 A special issue of the established journal Cultural Studies devoted to the study of culture in scientific and technological systems *Nature and Culture : American Landscape and Painting, 1825-1875, With a New Preface* Barbara Novak Altschul Professor of Art History Barnard College and Columbia University (Emerita), 2007-01-05 In this richly illustrated volume featuring more than fifty black and white illustrations and a beautiful eight page color insert Barbara Novak describes how for fifty extraordinary years American society drew from the idea of Nature its most cherished ideals Between 1825 and 1875 all kinds of Americans artists writers scientists as well as everyday citizens believed that God in Nature could resolve human contradictions and that nature itself confirmed the American destiny Using diaries and letters of the artists as well as quotes from literary texts journals and periodicals Novak illuminates the range of ideas projected onto the American landscape by painters such as Thomas Cole Albert Bierstadt Frederic Edwin Church Asher B Durand Fitz H Lane and Martin J Heade and writers such as Ralph Waldo Emerson Henry David Thoreau and Frederick Wilhelm von Schelling Now with a new preface this spectacular volume captures a vast cultural panorama It beautifully demonstrates how the idea of nature served not only as a vehicle for artistic creation but as its ideal form An impressive achievement Barbara Rose The New York Times Book Review An admirable blend of ambition elan and hard research Not just an art book it bears on some of the deepest fantasies of American culture as a whole Robert Hughes

Time Magazine *Culture, Technology, and the Creation of America's National Parks* Richard A. Grusin, 2004-04-22 Richard Grusin's innovative study investigates how the establishment of national parks participated in the production of American national identity after the Civil War. The creation of America's national parks is usually seen as an uncomplicated act of environmental preservation. Grusin argues instead that parks must be understood as complex cultural technologies for the reproduction of nature as landscape art. He explores the origins of America's three major parks: Yosemite, Yellowstone, and Grand Canyon in relation to other forms of landscape representation including photography, mapping, travel writing, and fiction.

The New Art of Photographing Nature Art Wolfe, Martha Hill, 2013-04-02 A new spin on the classic guide to composing stunning images of nature and wildlife. What is the difference between a good picture and a great one? In this fully revised edition of the classic bestseller *The Art of Photographing Nature*, master photographer Art Wolfe and former Audubon photo editor Martha Hill team up to explain the art of composing images of enduring beauty. Against a backdrop of more than 250 photographs of nature, wildlife, and landscapes, they share insights and advice about what works and what doesn't, and how small changes can take an image from ordinary to extraordinary. Throughout, all new tips from digital imaging expert Tim Grey show readers how to make the most of digital technology, whether by choosing the right color space, understanding sensor size, or removing distracting elements in post-processing. The result is an invaluable collection of expert advice updated for the modern age.

"Art, Technology and Nature" Camilla Skovbjerg Paldam, 2017-07-05 Since 1900, the connections between art and technology with nature have become increasingly inextricable. Through a selection of innovative readings by international scholars, this book presents the first investigation of the intersections between art, technology, and nature in post-medieval times. Transdisciplinary in approach, this volume's 14 essays explore art, technology, and nature's shifting constellations that are discernible at the micro level and as part of a larger chronological pattern. Included are subjects ranging from Renaissance wooden dolls, science in the Italian art academies, and artisanal epistemologies in the followers of Leonardo to Surrealism and its precursors in Mannerist grotesques and the Wunderkammer, eighteenth-century plant printing, the climate, and its artistic presentations from Constable to Olafur Eliasson and the hermeneutics of bioart. In their comprehensive introduction, editors Camilla Skovbjerg Paldam and Jacob Wamberg trace the Kantian heritage of radically separating art and technology and inserting both at a distance to nature, suggesting this was a transient chapter in history. Thus, they argue, the present renegotiation between art, technology, and nature is reminiscent of the ancient and medieval periods in which art and technology were categorized as aspects of a common area of cultivated products and their methods: the Latin *ars*, the Greek *techne*, an area moreover supposed to imitate the creative forces of nature.

The Ashgate Research Companion to Dutch Art of the Seventeenth Century Wayne Franits,2017-07-05 Despite the tremendous number of studies produced annually in the field of Dutch art over the last 30 years or so and the strong contemporary market for works by Dutch masters of the period as well as the public's ongoing fascination with some of its most beloved painters until now there has been no comprehensive study assessing the state of research in the field As the first study of its kind this book is a useful resource for scholars and advanced students of seventeenth century Dutch art and also serves as a springboard for further research Its 19 chapters divided into three sections and written by a team of internationally renowned art historians address a wide variety of topics ranging from those that might be considered traditional to others that have only drawn scholarly attention comparatively recently

Why Conserve Nature? Stephen Trudgill,2022-02-24 How we view nature transforms the world around us People rehearse stories about nature which make sense to them If we ask the question why conserve nature and the answers are based on myths then are these good myths to have Scientific knowledge about the environment is fundamental to ideas about how nature works It is essential to the conservation endeavour However any conservation motivation is nested within a society's meanings of nature and the way society values it Given the therapeutic and psychological significance of nature for us and our culture this book considers the meanings derived from the poetic and emotional attachment to a sense of place which is arguably just as important as scientific evidence The functional significance of species is important but so too is the therapeutic value of nature together with the historic and spiritual meanings entwined in a human feeling for landscape and wildlife
