Looking Into the Invisible Omraam Mikhaël Aïvanhov, 1991 *The Participatory Turn* Jorge N. Ferrer, Jacob H. Sherman, 2008-12-04 Cuts through traditional debates to argue that religious phenomena are cocreated by human cognition and a generative spiritual power **Arcane Lore** Scribe 27, 2002-07-04 This is guaranteed to be completely unlike any other occult text you've ever read whether it be some wussified New Age book about crystals and guardian angels or some classic tome of barely decipherable ceremonial evocations No this book is really something different You will find no references to potions poppets or pendulums nor shall you find illustrations of magic squares voodoo verfers or Enochian script Incantations folk magic numerology and the Seals of Solomon have also been excluded from this work What then remains Quite simply a magical philosophy which can be applied with great success by students at any level of advancement Great emphasis has been placed upon self knowledge and common sense secrets have also been divulged as to various tried and true methods which will enable a besieged magician to kick the boogyman's ass Although presented as a work of fiction this extensively researched text contains within it a great deal of occult Truth and it is highly entertaining as well The author is clearly either a genius or a madman perhaps both Yoga Journal, 1990-09 For more than 30 years Yoga Journal has been helping readers achieve the balance and well being they seek in their everyday lives With every issue Yoga Journal strives to inform and empower readers to make lifestyle choices that are healthy for their bodies and minds We are dedicated to providing in depth thoughtful editorial on topics such as yoga food nutrition fitness wellness travel and fashion and beauty

Contemporary Topics in Astrology and Astrological Divination, **A Psychological Approach to Translation** Akbar Dehghan Ferdows, 2014-10-17 The proposed book titled A Psychological Approach to Translation is in fact a study that contains six parts The first part describes the phenomena and events that motivated the researcher to think up and implement a semi descriptive semi experimental research the problems that translation students and teachers encounter

along translation courses and the specifically observed causes of failure in translating the primary and secondary purposes of the study and finally the reasons for the process of delimiting the study so that the main direction and goal of the research could be stated and illustrated The second part is a rather extensive and careful survey of many past and current linguistic and sociolinguistic theories and approaches pertaining to translation as both product and process with abundant clear cut examples and explanations Next part three is another careful survey of theories and problems this time psycholinguistic and purely psychological pertaining to human learning as a conditioned behavior together with several arguments and exemplifications presented in support of the main assumption in the study the impact of systematic extensive reading in TL on one's translating ability This part also reveals the fact that the existing psycholinguistic literature seriously suffers from the lack of adequate scientific explanations for the phenomenon of translating as a psychological behavior Next part four provides a description of step by step development instrumentation and implementation of the study based on the conventions of a regular research method It also includes information about the selection of data the subjects and their selection criteria the type of the test they were given and the kind of statistical analysis used to translate the results into figures quantification The fifth part fundamentally designed and intended to sum up the significant points discussed throughout the work also indicates some pedagogical implications and constructive suggestions for future translator training programs recommending more extensive and more scientific studies of both longitudinal and cross sectional types with factorial designs to investigate the effects of several independent variables at the same time and further contribute to the enrichment of the modern faculty known as Translation Studies Finally part six constitutes a quick reference handbook for both translators and translation students to read or review some basic concepts in translation theory as well as the practical steps they should take in the act of translating These steps are considered to be truly indispensable guidelines for the beginner who would often feel quite handicapped wondering what to do when faced with the task of translating a text for the first time Their overall plan and logical order are based on the actual methods and techniques of translating learned and adopted from practical teaching experience by the author and followed by him to this day The book closes with a comprehensive bibliography introducing a good number of both classic and new books on linguistics language teaching and testing psychology translation studies and other related subjects which can profitably be used as authentic sources of reference in additional or supplementary studies
