Rock, Michael Toman, 2015-02-09 Prior to 1979 China had a bifurcated and geographically dispersed industrial structure made up of a relatively small number of large scale state owned enterprises in various industries alongside numerous small scale energy intensive and polluting enterprises Economic reforms beginning in 1979 led to the rapid expansion of these small scale manufacturing enterprises in numerous energy intensive industries such as aluminum cement iron and steel and pulp and paper Subsequently the government adopted a new industrial development strategy labeled grasp the large let go the small The aims of this new policy were to close many of the unprofitable small scale manufacturing plants in these and other industries create a small number of large enterprises that could compete with OECD multinationals entice these larger enterprises to engage in high speed technological catch up and save energy China's Technological Catch Up Strategy traces the impact of this new industrial development strategy on technological catch up energy use and CO2 emissions In doing so the authors explore several detailed enterprise level case studies of technological catch up develop industry wide estimates of energy and CO2 savings from specific catch up interventions and present detailed econometric work on the determinants of energy intensity The authors conclude that China's strategy has contributed to substantial energy and CO2 savings but it has not led to either a peaking of or a decline in CO2 emissions in these industries More work is needed to cap and reduce China's CO2 emissions      *The Evangelical Herald*, 1916      **The Anatomy and Histology of the Human Eye** A. home in our lives Roger Kennedy puts forward the central role of what he has termed a psychic home as a vital psychic structure which gathers together a number of different human functions Kennedy questions what we mean by the powerfully evocative notion of the human soul which has important links to the notion of home and he suggests that what makes us human is that we allow a home for the soul As an illustration of this concept he explores how it can help to understand a vital element of William Wordsworth's development as a poet The word soul is both abstract and yet also powerfully emotive Kennedy shows that it can be approached from a number of different angles from psychoanalysis philosophy religion sociology literature and neuroscience The Psychic Home discusses the mysteries and complexities of the soul and aims to evoke some restoration of its place in our thinking It illustrates how the word soul and similar key words such as spirit and inwardness express so much that is essential for humans even if we cannot be too precise about their meanings Insightful enlightening and broad reaching The Psychic Home brings the concept of the soul centre stage as an entity that is elemental an essence irreducible and what makes us human as subjects of experience It will be essential reading for psychoanalysts psychotherapists neuroscientists philosophers and those interested in spirituality and religion
