From the 1950s to the digital age Americans have pushed their children to live science minded lives cementing scientific discovery and youthful curiosity as inseparable ideals In this multifaceted work historian Rebecca Onion examines the rise of informal children's science education in the twentieth century from the proliferation of home chemistry sets after World War

I to the century long boom in child centered science museums Onion looks at how the United States has increasingly focused its energies over the last century into producing young scientists outside of the classroom She shows that although Americans profess to believe that success in the sciences is synonymous with good citizenship this idea is deeply complicated in an era when scientific data is hotly contested and many Americans have a conflicted view of science itself These contradictions Onion explains can be understood by examining the histories of popular science and the development of ideas about American childhood She shows how the idealized concept of science has moved through the public consciousness and how the drive to make child scientists has deeply influenced American culture

Material Change Jan De Maeyer, Peter Jan Margry, 2021-12-17. The long nineteenth century c. 1780 c. 1920 in Western Europe saw an unprecedented rise in the production and possession of material goods. The material culture diversified and led to a rich variety of expressions. Dovetailing with a process of confessionalisation that manifested itself quite simultaneously, material religion witnessed its heyday in this period, from church buildings to small devotional objects. The present volume analyses how various types of reform, state, societal, and ecclesiastical that were part of the process of modernisation affected the material devotional culture within Protestantism, Anglicanism, and Roman Catholicism. Although the contributions in this book start from a comparative European perspective, the case studies mostly focus on individual countries in North West Europe, namely Germany, Belgium, the Netherlands, the United Kingdom, Ireland, Norway, Sweden, and Denmark. The concept of material religion is approached in a very inclusive way. The volume discusses, amongst others, parish infrastructures and religious buildings that are part of land and cityscapes, but also looks into interior design and decorations of chapels, churches, monasteries, cemeteries, and educational, charitable, and health institutions. It comprises the fine arts of religious painting and sculpture, the applied arts, and iconographic designs. As far as private material culture is concerned, this volume examines and presents objects related to private devotion at home, including a great variety of popular devotional and everyday life objects such as booklets, cards, photographs, and posters. *Dun's Review*, 1924 American Book Publishing Record, 2003 **The Toys of He-Man and the Masters of the Universe** Val Staples, Mattel, Dan Eardley, 2021-05-04.
