lead the reader through a well ordered argument which concludes with a well reasoned view of how management control should be. Instead it seeks to illustrate the many questions which have been posed but not answered and to open up agendas for future research.

Memorial Articles for 20th Century American Accounting Leaders Stephen Zeff, 2016-03-31 This collection of memorial articles and selected obituaries highlights the careers and contributions to accounting practice the accounting profession and the accounting literature of leading American figures in the 20th century. The memorial articles do much more than recite their subject's career. More importantly they discuss and assess their subject's role in influencing the course of accounting practice and the profession as well as the evolution of their influential writings revealing the names of the accounting leaders and leading thinkers of the past century. Memorial Articles for 20th Century American Accounting Leaders is useful in providing students and young researchers with a rich source of intelligence on the leaders who have established norms of practice, advanced the profession and set the terms of debate in the literature. Leaders who are cited and even quoted but who are known mostly as names without a full bodied treatment of their backgrounds and broader roles in shaping the accounting literature.

Manufacturing the Employee Roy Jacques, 1995-12-21 Contemporary thinking about management is still frequently presented as a set of universal eternal verities. In this fascinating book Roy Jacques presents a discursive history of industrial work relationships in the United States which powerfully demonstrates that they are not. A central concern is to show that current common sense in management forms an historically and culturally specific way of thinking about work and society which is often inappropriate for managing for the twenty first century. The author is equally interested in revealing the cultural basis for American management ideas currently exported round the world as an objective science disconnected from its cultural and historical roots. Roy Jacques considers the Federalist world of the U S c 1800-1870 and the traces of 19th century pre management notions continuing in 20th century management and industrial discourse: the emergence and development of industrial organization and big business; the profound remapping of the boundaries of social life which occurred with the creation of jobs and wages and the evolving construction of the employee as increasingly a disciplinary subject of psychological personnel and general management knowledge. He also looks at several major current management and organizational topics such as motivation, leadership and power in organizations, productivity and efficiency, work and the family, ideas about Total Quality Management, Business Process Re engineering, knowledge work and so on.
