approaches and perspectives and individuals New research has evolved including new approaches and these held perspectives have been challenged by social and culturally sensitive holistic as well as pluralistic and dynamic organic perspectives of human movements and moving humans Examples of such research can be found in disciplines such as physical education and pedagogy ethnography philosophy and sociology Learning Movements New Perspectives of Movement Education provides the societal and epistemological background for these new approaches and will be essential in disseminating this knowledge to movement educators academics and researchers as well as professionals within education sports health and fitness dance outdoor activities etc and that it will spearhead new and inclusive practices within these settings
