Mycotoxins John E. Smith, M. O. Moss, 1985-01-01 *Mycotoxins* J. E. Smith, M. O. Moss, 1985-12-23 Discussed in this book are the nature origin activity and control of the poisonous metabolites of moulds known as mycotoxins Laboratory Models for Foodborne Infections Dongyou Liu, 2017-03-16 Resulting from ingestion of inappropriately prepared or stored foods containing pathogenic viruses bacteria fungi and parasites foodborne infections have become a significant source of human morbidity and mortality worldwide in recent decades This may be largely attributable to the remarkable popularity of convenient ready to eat food products the dramatic expansion of international food trades and the continuing growth of immuno suppressed population groups Although anti microbial treatments have played a crucial part in the control of foodborne infections in the past the emergence and spread of anti microbial resistance render the existing treatments ineffective Additionally our limited understanding of the molecular mechanisms of foodborne infections has thwarted our efforts in the development of efficacious vaccines for foodborne pathogens Given the obvious benefits of laboratory models in foodborne disease research a great number of experiments have been conducted toward the elucidation of host pathogen interactions in and pathogenic mechanisms of foodborne infections Forming part of the Food Microbiology series *Laboratory Models for Foodborne Infections* presents a state of the art review of laboratory models that have proven valuable in deciphering the life cycle epidemiology immunobiology and other key aspects of foodborne pathogens Written by scientists with respective expertise in foodborne pathogen research each chapter includes a contemporary summary of a particular foodborne viral bacterial fungal or parasitic infection in relation to its life cycle epidemiology clinical features pathogenesis host pathogen interactions and other related aspects Besides providing a trustworthy source of information for undergraduates and postgraduates in food microbiology *Laboratory Models for Foodborne Infections* offers an invaluable guide for scientists and food microbiologists with interest in exploiting laboratory models for detailed study of foodborne infections *On-farm Mycotoxin Control in Food and Feed Grain* P. Golob, 2007-01-01 Mycotoxins are among the most potent causes of cancer Ingestion through the diet can pose chronic health risks for both humans and livestock Death may occur as a result of acute poisoning Mycotoxins are chemicals produced by fungal molds These molds grow during production harvesting and storage of grain pulses nuts roots and other crops This booklet is directed at the farm situation providing advice that can be used to avoid mycotoxin contamination before food leaves the farm The booklet describes what mycotoxins are how they are produced and how to recognize signs of their presence It provides advice to enable farmers to minimize the risk from mold contamination while the crop is growing during harvest and through storage Publisher s description **Manual of Environmental Microbiology** Christon J. Wood,2012-12-06 When I undertook the

production of the First Edition of this book it was my first foray into the world of book editing and I had no idea of what I was undertaking I was not entirely alone in this as in asking me to produce such a book the commissioning Editor Mr George Olley of Elsevier Applied Science Publishers had pictured a text of perhaps 300 pages but on seeing my list of chapter titles realized that we were talking about a chapter two volume work We eventually decided to go ahead with it and the result was more successful than either of us had dared to hope could be It was therefore with rather mixed emotions that I contemplated the case a second edition at the suggestion of Blackie Press who had taken over the title from Elsevier On the one hand I was naturally flattered that the book was considered important enough to justify a second edition On the other hand I was very well aware that the task would be even greater this time Environmental Toxicology J Rose,2003-09-02
